**Comments concerning draft rulemakings**

Commissioners, I implore you to consider the impact the changes to Rule 8 will have on Texans. It is time to reconsider how Rule 8 governs waste management. However, in your consideration, please do not be blinded by the special interest groups from the oil and gas sector. I hope you will do what is right for the people of Texas, not the oil and gas companies. Please do not let us down. I recommend harsh penalties for infractions against Rule 8, increased ability for landowners to petition against new waste recycling sites, and the removal of a company's ability to try experimental recycling methods. Landowners should have more than fifteen days to file a petition against constructing a new waste recycling site, and the whole community should be notified of its construction. I appreciate your consideration, Ryan
