Comments concerning proposed rulemakings

To: The Texas RR Commission The regulations for winterizing the oil and gas infrastructure is a good move in my opinion. However, there is no information from the energy sector on the economic costs and adhering to more regulatory burdens imposed by the Commission. In addition, there has been no regulations to reduce ERCOT's continued acquisition of wind and solar, which defeats the purpose in eliminating disruptions to the grid. This continuing decision by ERCOT will defeat any mandates to the oil and gas industry to weatherize its own infrastructure while these unreliable energy sources are added to the Texas grid.
