

Important Disclaimer

- A "data set" is any set of information electronically generated or stored by Railroad Commission of Texas (Commission) systems, including, but not limited to, the Commission's Geographic Information System, Online Research Query System, or Mainframe System.
- A "data visualization" is the representation of information in the form of a chart, diagram, picture, etc.
- The data sets and data visualizations for State Managed Plugging and *Annual Production Totals charts were generated from the Commission's licensed Microsoft PowerBI tool.
- These data visualizations are provided as a public service for informational purposes only.
- They are not intended to be used as an authoritative public record for any geographic location and have no legal force or effect.
- Organizations and individual users are responsible for verifying the accuracy, completeness, currency, and/or suitability of these data sets themselves.

The Commission specifically disclaims any and all warranties, representations, or endorsements, express or implied, with regard to these data sets, including, but not limited to, the warranties of merchantability, fitness for a particular purpose, or non-infringement of privately owned rights.

***Note:**

In Texas, production is reported by each oil and gas lease rather than individual well. Online monthly production data reflects a two-month lag time as production reports from operators are due on the last day of the month for the previous month. Production reports reflect a snapshot in time, as information may change and be updated as the RRC receives revised, corrected or delinquent production reports from operators.

Significant changes to the preliminary production figures will occur in decreasing amounts for approximately six to eight months due to the filing of corrected and late reports by industry. Commission staff anticipates that the production totals following that period are substantially complete, although continued minor changes occur thereafter. There is no point beyond which an operator may not file corrected production reports.
