

RAILROAD COMMISSION OF TEXAS

Oil and Gas Division

NOTICE TO OIL AND GAS OPERATORS

Form PR – Electronic Filing Requirements Effective September 1, 2021

On February 23, 2021, the Railroad Commission of Texas (RRC) adopted revisions to the instructions to the Form PR, *Monthly Production Report*. The revisions support the RRC's regulation of flaring and venting of produced natural gas. The proposed revisions are to the Form PR Instructions and how operators need to complete the form, not to the structure of the form itself. Details about the revisions are available on the RRC website at <https://www.rrc.texas.gov/announcements/030221-rrc-adopts-revisions-to-form-pr-monthly-production-report/>.

The RRC is delaying implementation of the revised Form PR to provide operators and the RRC time to make changes to their production reporting systems. Operators will continue to use the existing Form PR until the phased implementation.

- **On September 1, 2021**, Disposition Code 4 will no longer be accepted. Gas that is flared must be allocated to Disposition Code 10 and gas that is vented must be allocated to Disposition Code 11.
- **On January 1, 2022**, operators must report the applicable 2-letter authorization codes in the "REMARKS" field on the form.

To assist operators who file the Form PR via electronic data interchange (EDI), RRC staff has revised the EDI filing requirements document which can be downloaded from the RRC website at <https://www.rrc.texas.gov/media/oo2ors1p/edifilingrequirements.pdf>.

If you have questions about this notice or the Form PR, contact the Production Audit Unit of the RRC's Oil and Gas Division at 512-463-6726 or productionreporting-info@rrc.texas.gov.
