1.0 ABOUT THE ONLINE DRILLING PERMITS SYSTEM

1.1 Filing

The RRC Online Drilling Permits System allows operators and third-party filers to file for new or amended drilling permits if the required [Security Administrator Designation \(SAD\) paperwork](#) is on file with the Commission.

This online system also allows you to copy an existing permit to minimize the data entry required. You must have the original permit's status number or permit number.

You can also amend a drilling permit that has already been approved by entering the permit number or status number of the permit. To confirm that an amendment is required, please contact the [RRC Well Compliance section](#). If you are not sure of the permit number, you can use the online Drilling Permit Query (see [Section 3.1](#)) to find it. When you amend an existing permit, you must attach any attachments supporting the amended application. New fees apply to the amended filing.

Be sure that amending an existing permit is the correct action to take. If the well has been completed under another permit, a new *Recompletion* permit may be the correct filing. To file a recompletion permit, use the *New W-1* option, selecting *Recompletion* for the purpose of filing. If you are not sure of the purpose of filing, contact the [RRC Well Compliance section](#). Remember, if the application is set up with an incorrect purpose of filing and submitted, you may lose all of your fees, and you will need to resubmit the application correctly.

1.2 Fees

The system calculates fees based on the total vertical drilling depth. There are also other fees that can be applied to the permit application:

- Permit applications with exceptions to Statewide Rules require an additional \$200.00 fee.
- An additional \$150.00 fee is required for permit applications that require expedited handling.
- All fees are subject to the surcharge rate as approved in SWR 78.

To learn more about fees and surcharge rates, see the [Oil & Gas Fee Payment and Surcharges table](#) on the RRC public website.

Permit applications submitted without the required payment of fees will not be processed. All fees are nonrefundable and nontransferable.

1.3 Searches (Drilling Permit Query)

The online system also has a query function. You can search for permit applications that have been approved or those in the process of being approved. You can also search for permits that were withdrawn, dismissed, denied, as well as other status conditions. You can search for a permit or permit application by permit number, depth, date, county, district, filing purpose, and other permit attributes.

NOTE: This query retrieves more up-to-date information than the public Drilling Permit (W-1) Query available from the RRC public website. The public query is only updated on a nightly basis.

1.4 System Log In

To access the Drilling Permits (W-1) online system, you must log in to the [RRC Online System](#).

RRC ONLINE SYSTEM Choose an Application | Go | Log In

Log In
Log in to access the RRC Online System.

UserID:
Password:

[Forgot Password?](#) OR [Forgot User Id?](#)

The RRC Online System allows authorized entities to electronically file certain forms with the Railroad Commission online or through EDI. Forms processed through this system are ones containing data that has been migrated from the Commission's mainframe to an open system environment. Through the RRC Online System, forms can be filed online over the Internet using a web browser, or data files can be uploaded through the application.

How to Obtain a User ID:
To utilize the Online Filing system, you must have a User ID that is assigned to you by your company's designated Security Administrator. A company or individual may designate a Security Administrator by completing the Security Administrator Designation (SAD) form and mailing it to the RRC. When the SAD form is processed, the Security Administrator will receive a User ID and a temporary initial password. The Security Administrator will be able to log into the RRC Online System using their assigned User ID and create User IDs for users within their company. They will also be able to assign certain electronic filing rights for those accounts, and perform account maintenance activities (such as resetting passwords) when needed.

If you are uncertain whether your company has a security administrator, please email the Commission at rconline-security@rrc.state.tx.us.

1. [Read](#) the requirements for participating in online filing.
2. [Print](#) the SAD form.
3. Complete and sign the form then mail it to the RRC, following instructions on Page 2 of the form. When the form is processed, the designated security administrator will receive a User ID and temporary password by email.
4. The security administrator will log into the system and assign User IDs and filing rights.

[Disclaimer](#) | [RRC Online Home](#) | [RRC Home](#) | [Contact](#)

1. Enter your *User ID* that was assigned by your company's designated Security Administrator.
2. Enter your *Password*.

3. Click the **Submit** button. The system displays the RRC Online System Welcome page.

IMPORTANT: If you cannot log into the RRC Online System (the Welcome page does not display), it may be due to a delinquent P-5 filing or other enforcement action. Please contact the [RRC P-5 section](#) for more information.

If you do not see an RRC Online System application, it may be that your company's security administrator did not give you rights or they may need to update your company's [Security Administrator Designation \(SAD\) form](#) with the Commission to include rights to the applications needed.

4. Select the **Drilling Permits (W-1)** option from the Welcome page's menu. The system displays the Drilling Permits Main Menu.

1.5 Online Filing Features

Each online page contains common elements:

- Main Menu selection
- Summary permit application header information
- Navigation tabs
- Message area
- Permit application filing status

These elements are described in the following sections.

1.5.1 Main Menu Selection

The Main Menu includes links to the pages that allow you to apply for a drilling permit, amend a drilling permit, query permits, and query fields. Read the *Important News* section to learn the latest important news for filers.

1.5.2 Summary Permit Application Header Information

The first page to be completed in the online drilling permit application process is the *General Information* page. After this page is completed and saved, a header displays at the top of the page containing operator name and number, tracking number, the status of the permit, date created, lease name, well number, district, county, purpose of filing, and wellbore profile.

Status # API # Tracking # 489770481	OP # [REDACTED] - [REDACTED] COMPANY II, LLC Work In Progress , Created: 11/06/2015 , Filed: Online	TEST LEASE - Well # 1 06 - TRAVIS County	New Drill Horizontal
--	--	--	--------------------------------

This header also displays on all subsequent pages completed after the *General Information* is saved.

1.5.3 Tabs

The tabs at the top of each page provide navigation to the other pages required for the drilling permit application process. Each of the update pages has a **Save** button.

Certain tabs are not made available until specific pages have been completed and saved. When you begin a new permit application on the *General Information* page, that tab is the only one available. After you save that page, the *Field List*, *Attachment*, *Comments*, and *Review* tabs are displayed. More tabs are revealed as pages are completed and saved.

The image below shows all of the tabs in the permit application.

Click a tab to open the corresponding page.

1.5.4 Message Area

When you click the **Save** button on a page to save the data you have entered, error messages may display at the top identifying any data entry errors or missing items.

- Save Successful
- Coordinates are required.
- Survey perpendicular Distance 1 is required
- Distance from nearest town is required
- Survey perpendicular Distance 2 is required
- Survey perpendicular Direction 1 is required
- Survey perpendicular Direction 2 is required
- Direction from nearest town is required
- Surface Location Survey is required
- Nearest town is required

A *Save Successful* message means that the data that was entered was saved by the system. There still may be missing data, however.

If this symbol  appears next to an item on the page, it means that information is incomplete or invalid. Enter the missing data and/or correct data and click the **Save** button again.

When you access some pages, the message area may contain information about what is required to complete that particular page. For instance, using the information already saved for the permit application, the system determines what attachments are required for that particular permit and lists them in the message area of the *Attachments* page.

1.5.5 Permit Application Status

From the time you create your W-1 application in the online system until it is error-free and submitted, it has a status of *Work In Progress*. When you submit the W-1 application, the status changes to *Pending Approval*. After the application proceeds through the approval process without error, it has a status of *Approved*.

Your W-1 application can remain a *Work In Progress* for 30 days. In most cases, if the application is not completed and submitted within 30 days, it is removed from the *Work In Progress* list. It is deleted and no longer available. If you, however, have attempted to make a payment, it remains in the *Work In Progress* list until you submit the permit application.

NOTE: If you have attempted to make a payment and it was unsuccessful or you were successfully charged, but the application remains in your *Work In Progress* list, please contact the [RRC Drilling Permits section](#). Be prepared to provide the tracking number located in the application header.

1.5.5.1 Existing W-1 Statuses

The following table describes the possible statuses for your *Existing W-1* permit applications in the online system.

Status	Description
Work In Progress	The W-1 application has not yet been submitted to the RRC, but it is being worked on by the operator or RRC staff (if filed as a hard copy). The permit application is in <i>Work In Progress</i> status until it is error-free and submitted. IMPORTANT: When filing electronically, <i>Work In Progress</i> permit applications are only viewable by the operator who is submitting/working the permit.
Pending Approval	The status of the W-1 application is pending approval by the RRC. As soon as the permit application has been successfully submitted, the status changes to <i>Pending Approval</i> .
Approved	The W-1 application has been approved by the RRC. The operator now has a valid Drilling Permit.

Existing W-1 Permit Application Statuses

1.5.5.2 Drilling Permit Query Statuses

One of the search criteria for the Drilling Permit Query (see [Section 3.1](#)) is *Status*. The following table describes additional statuses in the query results besides *Work In Progress*, *Pending Approval*, and *Approved*.

Status	Description
Cancelled	The approved W-1 application is cancelled at the request of the operator.
Closed	The W-1 application is closed by Oil and Gas docket services per RRC commission order.
Deleted	The W-1 application is deleted by internal staff if it is originally submitted incorrectly.
Denied	The W-1 application is denied by Oil and Gas docket services per RRC commission order.
Dismissed	The W-1 application is dismissed after 90 days if it has not been completed correctly and the applicant has failed to resolve the issues.
Withdrawn	The W-1 application is withdrawn per request by the operator.
Other	A status not covered by the standard codes.

Drilling Permit Query Application Statuses

The current status of the permit application displays in the header area at the top of each page.

Status # API # Tracking # 489770481	OP # [REDACTED] - [REDACTED] COMPANY II, LLC Work In Progress Created: 11/06/2015 ,Filed: Online	TEST LEASE - Well # 1 06 - TRAVIS County	New Drill Horizontal
---	---	---	-------------------------

2.0 DRILLING PERMIT FILING PROCEDURES

Filing procedures vary depending on the purpose of filing. There are five purposes of filing:

- **New Drill:** Drilling a new wellbore.
- **Recompletion:** Working over an existing wellbore to complete in a different field/reservoir or deepening the wellbore beyond its original, approved vertical depth in the same field.
- **Re-entry:** Going back into a wellbore that has been plugged to the surface.
- **Reclassification:** Changing an existing well originally permitted only as injection/disposal or other service well to an oil or gas producing well or changing an existing well in the Panhandle East or West fields from oil to gas or gas to oil production. No new work should have been done to the wellbore. If any work was done to the wellbore, then the appropriate purpose of filing should be *Recompletion*. If you are unsure that *Reclassification* is the correct purpose of filing, contact the [RRC Well Compliance section](#).
- **Field Transfer:** Transfer a well from one field to another.

NOTE: A Field Transfer cannot be done as an amended permit after all the completion papers are in. No new work should have been done to the wellbore since the filing of the original completion paperwork. In order to change completion papers after validation, you must apply by letter to Technical Permitting for a Field Transfer. You must show that the well is not in the correct field. Once Technical Permitting approves the field transfer, you must file a new W-1 (a new permit number needs to be issued) with **Field Transfer** selected as the *Purpose of Filing*, file a G-2/W-2 noting the field change, and file a P-4 reflecting the change. A copy of the approved Field Transfer letter must be included in your W-1 application.

2.1 Filing for a New Drilling Permit (New Drill)

To file a new drilling permit, select **New W-1** from the Drilling Permits Main Menu. The system displays the *W-1: General Information* page.

2.1.1 W-1: General Information Page

Completing the *General Information* page is the first stage in creating a new W-1. The *General Information* page includes information about the lease and location. The data entered on this page provides some general information about the wellbore. The minimum information required to start a permit application is:

- Purpose of Filing
- Wellbore Profile
- Lease Name
- Well Number
- Total Vertical Depth
- County
- GPS Coordinate Information (for the surface location)

When these items are entered and **Saved**, the system creates a *Work In Progress* shell that can be located from the *Existing W-1s* link on the Drilling Permits Main Menu page. This feature allows an operator to leave and return later to complete the work on the permit application.

All the location information requested on this page pertains to the SURFACE location of the wellbore. Information from this page affects the wellbore profile options that display on the *Field Details* page. If the wellbore is directionally or horizontally drilled, location information pertaining to any bottomhole(s) and/or lateral(s) is requested on the *Field Details* page.

The numerical labels in the following diagram of the *General Information* page correspond to the step-by-step instructions below.

The screenshot shows the 'General Information' form with the following sections and callouts:

- 1**: *Purpose of Filing (radio buttons for New Drill, Recompletion, Reclass, Field Transfer, Reenter)
- 2**: Expedite (checkbox)
- 3**: *Wellbore Profiles (checkboxes for Vertical, Horizontal, Directional, Sidetrack)
- 4**: Horizontal Wellbore Type (for Horizontal Wellbore Profiles only) (checkboxes for PSA, Allocation, Stacked Lateral; Status Number (for Stacked Lateral only) text box)
- 5**: *W-1 Defaults (Lease name: text box, Well number: text box)
- 6**: *Total Vertical Depth: text box
- 7**: *Do you have the right to develop minerals under any right-of-way? (radio buttons for Yes, No)
- 8**: *Is this well subject to SWR 36 (hydrogen sulfide area)? SWR 36 will automatically be determined by the system according to Field List entries provided.
- 8**: County: (please choose) dropdown
- 9**: Datum: (please choose) dropdown, Reset button
- 10**: *Surface Location section (API No., Surface Location Type, Distance from nearest town, Direction from nearest town, Nearest Town, Surface Survey/Legal Location Information, Additional information about the location)
- 11**: Perpendicular surface location from two nearest designated reference lines: table with columns for Perpendiculars, Distance, Direction, Distance, Direction
- 12**: Save button

The header information at the top of the page reflects the name and number of the logged in operator.

1. Select the *Purpose of Filing*.

- Select **New Drill** when you are drilling a new wellbore.
- Select **Recompletion** when you are working over an existing wellbore to complete in a different field/reservoir or deepening the wellbore beyond its original, approved vertical depth in the same field.
- Select **Reclass** to change an existing well originally permitted only as injection/disposal or other service well to an oil or gas producing well or

changing an existing well in the Panhandle East or West fields from oil to gas or gas to oil production. No work should have been done to the wellbore. If any work was done to the wellbore, then the appropriate purpose of filing should be *Recompletion*.

- Select **Field Transfer** when a well is being transferred from one RRC regulatory field to another regulatory field. No new work should have been done to the wellbore since the filing of the original completion paperwork. A copy of the approved Field Transfer letter must be included in your W-1 application.
 - Select **Re-entry** when you are going back into a wellbore that has been plugged to the surface.
2. Select **Expedite** if you want the permit application process expedited. (Additional fees apply.)

NOTE: Read the *Important News* section on the Drilling Permits Main Menu to learn the current permit application processing times.

3. Select the *Wellbore Profile* associated with the wellbore (*Vertical, Horizontal, Directional, or Sidetrack*). You can select all profiles that apply to the wellbore.

NOTE: If you select *Sidetrack*, you should also select another wellbore profile.

IMPORTANT: Drilling Permits requests that you submit an application for multiple wellbore profiles (i.e., vertical and directional; or vertical and horizontal) only if both profiles will be completed as a producer or injection well type (i.e., Oil or Gas/Oil/Gas/Injection).

If a vertical pilot hole (i.e., Exploratory Well type) is permitted with a directional or horizontal well, the vertical profile should not be submitted at this time. This will ensure that the vertical wellbore application doesn't get flagged for a SWR 37 exception that is not needed.

IMPORTANT: If you have already added fields and wellbore profile information to this application, unchecking a Wellbore Profile selection on the General Information tab will DELETE the corresponding wellbore profile on the Field Details pages for all the fields on this application. See [Sections 2.1.3.2.1](#) and [2.1.3.2.2](#) for further information.

4. For horizontal wells, if you are applying for a special permit type, select the *Horizontal Wellbore Type* (*PSA, Allocation, or Stacked Lateral*). If you select *Stacked Lateral*, provide the permit number of the “record” or “parent” well in the *Status Number* field.
5. In the *W-1 Defaults* section, enter the *Lease name* and the *Well number*. (For a new drill, the well number is the next number available for wells on the lease.)
For your well number, you are allowed six characters. The first character can be either alpha or numeric. The second, third, and fourth characters are numeric only. The fifth and sixth characters are alpha only.
6. Enter the *Total Vertical Depth* to which the well is to be drilled.
7. If you have the right to develop minerals under any right-of-way, select **Yes**. If not, select **No**. If you select *No*, you need to confirm that the well location complies with the Commission’s lease spacing rules (SWR 37).

NOTE: The system automatically determines if the well is in a hydrogen sulfide area (SWR 36) using the *Field List* entries provided. To view a list of these fields, see the [Hydrogen Sulfide \(H2S\) Fields and Concentrations Listings](#) on the RRC public website.

8. Select the *County* in which the surface location of the well is located.

Steps 1 – 6 and 8 are required before you can save a permit application. Once those are entered, you can click the **Save** button. The system creates a replica of the W-1 form, filled in with the data you have entered to this point. Each time you save, this form replica is updated to reflect all data entered to that point. To view this form in a PDF format, click the **View Current W-1** link on the *Review* page.

9. Enter the GPS coordinates for the surface location of the well.
 - a. Select the *Datum* from the drop-down.
 - b. Enter the coordinates using one of the following formats:
 - *Latitude and Longitude* in degrees, minutes, seconds.
 - *Latitude and Longitude* in decimal degrees.
 - *X-Coordinate/Easting and Y-Coordinate/Northing* in the state plane zone.
If you use state plane coordinates, use the drop-down list to select the zone.
10. In the *Surface Location* section, complete the following:
 - If purpose of filing is anything but *New Drill*, you must enter an *API Number*.
 - Select *Surface Location Type* from the drop-down (*Bay/Estuary, Inland Waterway, Land, or Offshore*).

NOTE: For a *Surface Location Type* of *OffShore*, you must have the appropriate financial assurance filed with the Commission, or the permit will not be approved.

- Enter the distance from the nearest town (in miles). (If the well site is in the city limits, enter 0.)
- Select the direction **from** the nearest town to the well from the drop-down.
- Enter the name of the *Nearest Town* to the well in the county.
- Enter *Surface Survey/Legal Location Information*. *Survey* is a required field. You can manually enter the *Survey, Section, Block, Abstract #, Township, League, Labor, Porcion, Share, Tract, or Lot* names. Then enter any other information about the location in the *Additional information about the location* field.
 - **Auto-Populate:** If you know the abstract number and county of the well location, you can use the Commission’s GIS system to auto-populate the *Survey, Section, and Block*. Select a *County*, enter the abstract number, and then click the **Auto-Populate** button. The *Survey, Section, and Block* information related to that abstract are displayed. (You must manually enter any other information in the *Surface Survey/Legal Location Information* section.)

TIP: If you believe any of this information is incorrect, you can change it as needed. Upon receipt of the permit application, the Commission Mapping staff researches the discrepancy and provides you with the correct information.

11. Enter the perpendicular surface location (distance in feet) from the two nearest designated survey lines (north, south, east, or west). You should not use a county line unless it is the actual boundary line of a survey.
12. Click the **Save** button to save the *General Information* you just entered. The system saves the data and redisplay the page. If data is missing or incorrect, error messages are displayed at the top. Also, if a yellow warning triangle ⚠ appears next to items on the page, it means you have missing or invalid information. (See [Section 1.5.4 Messages](#) for further information.) You cannot submit the final permit application with errors.

• County is required
 • You must select either horizontal/directional/vertical for default profile

General Information

Save (please hit save to see errors on this page)

*Purpose of Filing New Drill Recompletion Reclass Field Transfer Reenter

Expedite

⚠ *Wellbore Profiles Vertical Horizontal Directional Sidetrack

Horizontal Wellbore Type (for Horizontal Wellbore Profiles only) PSA Allocation Stacked Lateral Status Number (for Stacked Lateral only)

*W-1 Defaults Lease name: Well number:

*Total Vertical Depth:

*Do you have the right to develop minerals under any right-of-way? Yes No

*Is this well subject to SWR 36 (hydrogen sulfide area)? SWR 36 will automatically be determined by the system according to Field List entries provided.

County: ⚠ (please choose)

For a new drill or amended application, enter GPS coordinates for surface location in one of the following formats: 1) degrees, minutes, seconds; 2) decimal degrees; or 3) state plane. For decimal degrees, enter coordinates in the Degrees boxes.

After saving the data on this page, click the Display Coordinates button to view the coordinates on the GIS. If necessary, the data entered coordinates will be converted to decimal degrees, the RRC standard format. The decimal degrees coordinates will display as a hyperlink. Click the hyperlink to view the surface location on the GIS. **Important:** If you make any changes to the coordinates after viewing them on the GIS, be sure to save the record, and then click Display Coordinates again to view the updated location.

Datum: (please choose)

Latitude		Longitude		State Plane		
Degrees:	<input type="text"/>	<input type="text"/>	<input type="text"/>	X-Coordinates	Y-Coordinates	Select Zone

Save

* required information

You can save at any point as long as you have entered the required items needed to start an application:

- Purpose of filing
- Wellbore profile
- Lease name
- Well number
- Total vertical depth
- County

If you start a drilling permit application and save it after each page (or tab), you can locate that permit application from the Drilling Permits Main Menu page by clicking the **Existing W-1s** link. (See [Section 2.6](#) for more information about accessing existing W1s.)

To continue with the filing, click the **Field List** tab.

2.1.2 Field List Page

To add fields to the permit application, first select the **Field List** tab from the top of the *General Information* page. The system displays an *Add Field* button.

The *Associated 49B Fields with non-matching numbers* link accesses a list of fields that produce both oil and gas. Normally these fields have the same number for oil and gas. However, the fields in the list are fields that produce oil and gas and have one field number for oil and a different number for gas. Refer to this list when trying to locate this type of field.

Click the **Add Field** button, and the system displays the *Field Search* page.

To add fields:

1. Specify one of the following types of selection criteria to use:
 - **Beginning with these characters:** Searches the first few letters of the field name for the letters you specify. Enter a minimum of 3 characters. For example, to find the Carthage field, enter CAR and click **Search**.

- **Containing these characters:** This is a wildcard search. Type in whatever letters you want to match in the query. For example, to find all fields with a reservoir of Austin chalk, enter `Aust i n` and click **Search**.
- **Matching this Number Exactly:** Enter the 8-digit RRC field number and click **Search**.

2. Click the **Search** button. The system displays a list of all fields that match your search criteria.

Field Query Results

Field Search

Search Again

Search for a Field: Beginning with these characters
 Containing these characters (Please enter at least 3 characters)
 Matching this Number Exactly

Field Query Results

Select the field(s) in the following list (use Ctrl+Click to select multiple fields). Click "Submit" to return to the Field List page.

65280200 09 NEWARK, EAST (BARNETT SHALE)

3. Select the appropriate field and click **Submit**. To select multiple entries from the list, select the first one, and then hold down the **CTRL** button on your keyboard while selecting additional fields. If the field you are searching for is not in the list, you can search again from the top of the page.

NOTE: Some fields are in multiple districts. Confirm that you are selecting the field in the correct district. See the following screenshot to view an example of a field in multiple districts.

Field Search

85280300 08 SPRABERRY (TREND AREA)
85280301 08 SPRABERRY (TREND AREA) R 40 EXC
85280400 08 SPRABERRY (TREND AREA CL. FK.)
85280500 08 SPRABERRY (TREND AREA DEAN-WLFCP)

- When you click **Submit**, the system returns you to the *Field List* page with the selected field appearing in the *Field List* table.

NOTE: After you add a field in the *Field List* page, you can click the **Edit** link next to that field to go to the *Field Details* page and enter the wellbore profile information. If you do this, any fields added on the *Field List* page are populated with the wellbore information from that first field entered (the primary field). You can then edit the necessary items rather than completely entering all the information again. (See [Section 2.1.3](#) for instructions on how to enter and edit *Field Details*.)

You can also add all the fields first, and then add all the details.

General Information **Field List** Field Details Attachments Comments Review

Click Add Field button to add a field to this permit.

[Associated 49B Fields with non-matching numbers](#)

Field List

The first field added automatically becomes the primary field. Thereafter, all fields added will be pre-populated with data from the primary field. Click **Drilling Permits Help** to learn how to change the primary field.

To enter additional information about a field, click **Edit** to access the **Field Details** screen.

For a directional or horizontal wellbore profile, you must indicate if the surface location is off-lease. For a horizontal wellbore profile, you must also indicate if the penetration point is off-lease. **Be sure to click Save Changes after you update the off-lease indicators.**

Note: All applications submitted before February 2016 will display the off-lease indicators with a default value of 'No.' The information provided on the plat is the authoritative source for this information.

Status	Dist #	Field Name	Field #	Lease Name	Well #	Well Type	Compl. Depth	Off-lease Surface Location	Off-lease Penetration Point	
	01	SMILEY (AUSTIN CHALK) Primary Field	84249500	ACME	4H	Oil or Gas Well		<input type="radio"/> Yes <input checked="" type="radio"/> No	<input type="radio"/> Yes <input checked="" type="radio"/> No	Delete Edit
The Field SMILEY (AUSTIN CHALK) has been identified as subject to SWR 36 (Hydrogen Sulfide Area). Hydrogen Sulfide Fields with perforations must be isolated and tested per State Wide Rule 36 and a Form H-9 filed with the district office. Fields with SWR 10 authority to downhole commingle must be isolated and tested individually prior to commingling production.										
	01	SMILEY (BUDA) Make Primary Field	84249550	ACME	4H	Oil Well		<input type="radio"/> Yes <input checked="" type="radio"/> No	<input type="radio"/> Yes <input checked="" type="radio"/> No	Delete Edit
The Field SMILEY (BUDA) has been identified as subject to SWR 36 (Hydrogen Sulfide Area). Hydrogen Sulfide Fields with perforations must be isolated and tested per State Wide Rule 36 and a Form H-9 filed with the district office. Fields with SWR 10 authority to downhole commingle must be isolated and tested individually prior to commingling production.										

- For fields with a horizontal or directional wellbore profile, select **Yes** or **No** for *Off-lease Surface Location*. Click the **Save Changes** button after you update the off-lease indicators.
- For fields with a horizontal wellbore profile, select **Yes** or **No** for *Off-lease Penetration Point*. Click the **Save Changes** button after you update the off-lease indicators. See [Section 2.1.3.3](#) for information about selecting a resolution for an off-lease penetration point.
- If the field list contains two or more fields, you can change the primary field designation by clicking the **Make Primary Field** link that is in the *Field Name* column for any field

that is not the primary field. The first field added is automatically designated by the system as the primary field.

- If you need to delete a field from the *Field List*, click the **Delete** link corresponding to that field. It is located in the last column of the table.

NOTE: You cannot delete the primary field, and if you have an attachment associated with a field, you must delete the attachment before you can delete the field.

- To add or edit field details, click the **Edit** link corresponding to that field (located in the last column). The *Field Details* page displays. For instructions on entering and editing field details, see the following section.

The next part of the permitting process is to enter or edit field details on the *Field Details* page.

2.1.3 Field Details

This page is used to add or edit details about the field that were not included in the first two pages (*General Information* and *Field List*). This provides the capability to perform the following tasks:

- Enter missing *Basic Details* or edit existing *Basic Details*.
- Enter the *Wellbore Profile* or edit the information.
- Add multiple terminus locations in the *Wellbore Profile*.
- Report the resolutions of any off-lease penetration point issues (for horizontal wellbore profiles only).
- Add requests for exceptions to the Statewide Rules that apply to the field.

Step 9 in the previous section explains how to access the *Field Details* page from the *Field List* page. Otherwise, click the **Field Details** tab from any page.

2.1.3.1 Basic Details

The top section of the page allows for the entry or edit of field basic details.

General Information | Field List | **Field Details** | Attachments | Comments | Review

Field Name: NEWARK, EAST (BARNETT SHALE) NEWARK, EAST (BARNETT SHALE) 09-65280200

(please hit save to see errors on this page)

***Basic Details**

Lease name: Well number: Distance to Nearest Lease Line from Surface Location:

Total Acres in the Lease: Off-lease Surface Location: No Off-lease Penetration Point: No

Surface Lease Line Perpendiculars:	Distance	Direction	Distance	Direction
	480	feet from the South	line and 3800	feet from the West
			line	

Pooled/Unitized: (Check if yes) Unitized Docket Number: (Required only if Unitized)

Well Type: Completion Depth: Distance to Nearest Well:

No. of Wells: Total Depth: 10900

When you select the *Field Details* tab, the primary field information is displayed. If you clicked the *Edit* link next to a field in the *Field List*, that field's information is displayed in the *Field Details* page.

1. If you want to add details for a field other than the one currently displayed in the page, select another field from the drop-down in the upper right corner, and then click the **Go** button.
2. Enter any *Basic Details* that have not already been entered through the *General Information* page.
 - In *Lease name*, the name is populated from the *General Information* page. Change this if necessary.
 - Enter the *Well number* if not populated from the *General Information* page.
 - Enter *Distance to Nearest Lease Line from Surface Location (for all wellbore profiles.)* For a vertical well application, this distance is used to determine whether a SWR 37 exception is needed.
 - *Distance to Nearest Lease Line from Surface Location* is measured in feet from the surface hole location to the nearest point on the external lease line, pooled unit line or interior tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception for a vertical well application, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about SWR exceptions.)

NOTE: For an application created before 05/31/2020, this data field is labeled as *Distance to Nearest Lease Line* and is used for all wellbore profiles to calculate whether a SWR 37 exception is needed. The measurement entered in *Distance to Nearest Lease Line* is based on the wellbore profile selected on the *General Information* page.

- For a vertical well application, enter the distance measured from the surface hole location to the nearest point on the external lease line, pooled unit line or interior tract line.
- For a horizontal well application, enter the distance measured from the closest point of the well to the external lease line, pooled unit line or interior tract line. The well begins at the first take point, continues along the course of the wellbore path, and ends at the last take point.

- For a directional well application, enter the distance measured from the bottomhole location to the external lease line, pooled unit line or interior tract line.
- For all wellbore profiles, if the distance is measured from the well to a pooled unit line instead of an external lease line, and if there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about SWR exceptions.)

- In *Total Acres in the Lease*, enter the total acreage in the lease. If pooled, this should be total acreage in pooled lease.

NOTE: Per SWR 5, if this well is the first well on the lease, you must file a plat that shows the entire lease to support the application.

- In *Surface Lease Line Perpendiculars*, enter the distance (in feet and with up to two decimals) from two of the nearest non-parallel lease lines to the surface location.

If you use an off-lease surface location for a horizontal or directional wellbore profile, the system prepopulates the *Surface Survey Line Perpendiculars* in this section from the location information on the *General Information* tab. The screenshot below shows the *Surface Survey Line Perpendiculars* area for horizontal and directional wellbore profiles.

Surface Survey Line Perpendiculars:	Distance	Direction	Distance	Direction
	480.0 feet	from the South line	and 335.0 feet	from the East line

NOTE: 1) For an off-lease surface location, the label displays as *Surface Survey Line Perpendiculars*. **2)** If you need to change the surface location to on-lease, return to the *Field Details* tab and select **No** for *Off-lease Surface Location*. Click the **Save Changes** button after you update the off-lease indicators.

- In *Pooled/Unitized*, check if the lease is composed of several tracts that are pooled together to make up the lease. If checked, attach a scanned image of a completed P-12 (Pooling Authority form), or enter the docket number of the approved unitization hearing.
- In *Well Type*, select one option from the drop-down menu as you list each field.

NOTE: You may not see all well types available for a given field. For instance, a field classified only as a gas zone cannot have an oil well permitted. You must apply for a permit for a gas completion (meeting the current gas rules). If, once the well is completed, the type well requires that the field be made associated, then the next well permitted can be permitted as oil, gas, or both. Also, some service wells are not permitted in Wildcat fields. Only the type of well that may possibly be permitted in the given field appears in the drop-down box.

NOTE: If a productive wellbore type (oil or gas well) is not an available selection for the *Well Type*, verify that the field had not been consolidated into another regulatory field. Check the *Don't Permit* indicator and *Comments* in the field rules at the bottom of the page. If the *Don't Permit* indicator is set to Y, this regulatory field has been consolidated for production purposes into another regulatory field.

Field Rules							
Oil Field Rules:							
County Regular: N Salt Dome: N Field Location: LAND Don't Permit: Y							
Schedule Remarks: DORA, NORTH (CONS.) FIELD, EFFECTIVE DATE 5/9/11							
Comments:							
Rule Type	Depth	Lease Spacing	Well Spacing	Acres per Unit	Tolerance Acres	Diagonal Code	Diagonal Max Length
Special Rules All Depths		330	933	40.0	20.0	Corner to Corner	2100

Consult the proration schedule or [RRC Well Compliance section](#) if you have questions concerning a field.

- In *Completion Depth*, enter the vertical completion depth. It cannot be deeper than the total vertical depth entered on the *General Information* page.
- In *Distance to Nearest Well*, enter the distance to the nearest oil or gas well applied for, permitted, or completed (well on schedule) on this lease in the same field and reservoir.

The *Distance to Nearest Well* is based on the selected wellbore profile on the *General Information* tab.

- For vertical wells, this distance is measured from the surface location.
- For horizontal wells, this distance is measured from the closest point of the well. The well begins at the first take point, continues along the course of the wellbore path, and ends at the last take point.
- For directional wells, this distance is measured from the bottomhole location only.

- In *No. of Wells*, enter the total combined number of oil and gas wells only (include applied for, permitted, and completed oil and gas wells); do not include injection, disposal, or other types of service wells.
- *Total Depth* is populated from the *General Information* page.

2.1.3.2 SWR 40

On the *Field Details* tab, below the *Basic Details* Section, is the enhanced *SWR 40* section. This section was built to accommodate the enhanced options afforded by Statewide Rule 40, to allow filers the ability to provide information for SWR 40(e)(2) exceptions on a W-1 application.

State Wide Rule 40	Form W-1 Instructions	Form P-16 Instructions
In the current application, is the operator seeking multiple assignment of acreage under Statewide Rule 40?: <input type="button" value="No"/>		
If No is chosen, then the additional information below is not required and you may proceed to the wellbore profile section below.		
1. Will the well be completed in a "UFT" field? <input type="button" value="None Selected"/>		
"UFT" status can be found in the Special Horizontal Field Rules section of this application.		
2. Is ownership of the right to drill or produce "divided horizontally", i.e., separated into depth intervals defined by total vertical depth, depth relative to a specific geological contact, or some other similar discriminator? <input type="button" value="None Selected"/>		
3. Please provide the upper and lower limits of the applicant's Horizontal Ownership Interval: Upper Limit: <input type="text"/> Lower Limit: <input type="text"/>		
If this W-1 is for an Allocation or PSA well and there are multiple severances, the first severance encountered by the wellbore will be entered in the boxes above. Section 5 of the P-16 will capture the severance values for each developmental tract.		
4. Is the applicant the owner of all wells, including any wells permitted but not yet drilled or completed, located within one-half mile of the proposed wellbore between the first and last take points? <input type="button" value="None Selected"/>		
If No, please attach copies of the SWR 40 notice, SWR 40 service list, and certified plat as required by SWR 40(e)(2)(B).		
5. If the well will not be completed in a UFT field, or if the well will be completed in a UFT field but the right to drill and produce has not been divided horizontally, please provide the docket number of the final order approving the multiple assignment of acreage for the subject well or RRC lease/unit. Docket Number: <input type="text"/>		
If a Docket # is provided, please also enter the approved interval from the Commission Approved Final Order in the boxes provided for question #3		
Please see SWR 40(g) for more information about the public hearing process.		
Note: If the answer to question 1 and/or 2 is NO, then this application cannot be approved until the applicant has been granted authority for the multiple assignment of acreage via a Commission approved Final Order.		

The "State Wide Rule 40" section begins with a qualifying question which asks if the filer is applying for an exception to SWR 40(e)(2). There are two options:

- a) *NO* – If no is selected, then no additional information needs to be provided in this section.
- b) *YES* – If yes is selected, then the user will continue through the subsequent questions.

The following questions are to be answered if *yes* was chosen for the qualifying question. Please refer to the above screenshot for the question text.

- 1) The default answer to this question is "None Selected." There are two options:
 - a. *YES* – if *yes* is selected, then you will proceed to question 2.
 - b. *NO* – If no is selected, then you will need to provide an approved Final Order Docket Number, which grants you the right to double assign surface acreage in a non-UFT field.
- 2) The default answer to this question is, "None Selected." There are two options:
 - a. *YES* – If *yes* is selected, then you will proceed to question 3.
 - b. *NO* – If *no* is selected, then you will need to provide an approved Final Order Docket Number, which grants you the right to double assign surface acreage when your ownership rights are not divided horizontally by total vertical depth, depth relative to a specific geological contact, or some other similar discriminator.

- 3) This question will capture the numerical values of your ownership interval.
- a. If the beginning qualifying question was answered with No, then you will NOT need to add any information for this question because an exception to SWR 40(e)(2) is not being sought.
 - b. The completion depth on your W-1 must be greater than (or equal to) the upper limit of your ownership interval, and lesser than (or equal to) the lower limit of your ownership interval.
 - c. If your W-1 is for an Allocation or PSA well, and there are different ownership interval values in your various developmental tracts, then you will pick the strictest ownership interval from what you have listed in Section V and enter the upper and lower value for that interval, in the boxes on the W-1.
 - i. The revisions to Section V of the P-16 will now handle the ownership interval information for your Allocation or PSA developmental tracts.
 1. The completion depth on the W-1 *must* fall within each of the intervals listed in Section V of the P-16. (If a developmental tract contains full intervals rights, you will leave the interval boxes for that tract in Section V of the P-16 empty. Please see the updated P-16 instructions at the link below. They will be live starting June 29th, 2022).
 - ii. Per the revised [P-16 instructions](#), if a developmental tract has full interval rights, you will leave it's intervals in Section V blank. (0/999999 will NO longer be used).
 - d. If you answered Question #1 or #2 as NO, and have provided a Final Order Docket Number, then your ownership intervals entered should match what has been approved in the Final Order.

4) The default answer to this question is, "None Selected." There are two answers:

- a. *YES* – If *yes* is selected, then you will not be required to upload an SWR 40 notice, or an SWR 40 Service List.
- b. *NO* – If *no* is selected, then you will be required to attach an SWR 40 Notice along with an SWR 40 Service List.

NOTE: The two attachments mentioned above (SWR 40 Notice and SWR 40 Service List) now have their own file type classification from the drop-down menu on the Attachments tab. "Other" will no longer be used when attaching these documents, in lieu of the new file types. If you do not use the new file types when attaching the require notice and service list, then an error message will persist. You will need to remove them, and then re-attach them using the new classifications to clear the error and allow the W-1 to be submitted. An attachment of each type is required.

- 5) You will need to provide a Final Order Docket Number when either (or both) of two conditions exist:
- a. If the regulatory field on your W-1 is NOT designated as UFT.
 - i. If multiple fields exist on a W-1 and there is a mix of UFT fields, then you will need to follow the Rule 40 procedures for each field, based on their UFT designation of Yes or No.
 - b. If you are seeking to double assign surface acreage double assign surface acreage when your ownership rights are not divided horizontally by total vertical depth, depth relative to a specific geological contact, or some other similar discriminator. Under this scenario, you will still be required to provide a Final Order Docket Number even if your regulatory Field is designated UFT.
 - c. The Upper and Lower limit of the ownership interval approved in the Final Order will be used for Question 3 and must match what is shown in the Final Order document.

2.1.3.3 Wellbore Profile

On the *Field Details* page, in the *Wellbore Profile* section, there is an area for specifying one profile. This area is based on the wellbore profile entered on the *General Information* page.

If a vertical wellbore profile is the only selection on the *General Information* page, there is no *Wellbore Profile* section on the *Field Details* page. Skip to the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about selecting Statewide Rule exceptions.)

NOTE: If both a horizontal and directional wellbore profile were selected on the *General Information* page, for each selected field, you need to delete the wellbore profile not associated to the field from its *Field Details* page.

2.1.3.3.1 Directional Wells

Wellbore Profile

Distance to Nearest Lease Line from Bottomhole Location:

Enter Abstract #, select the County and click Auto-Populate, or fill in Survey, Section, and Block manually.

Section: Block: Survey:

Abstract #: A- County:

Additional information about the location:

Delete	Name	Profile	Distance (ft)	Direction	Distance (ft)	Direction
<input type="checkbox"/>	BH1	Bottomhole	Lease <input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		Survey	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line

1. For a directional wellbore profile, if the application is created on or after 05/31/2020, enter *Distance to Nearest Lease Line from Bottomhole Location*. This distance is used to determine whether a SWR 37 lease line exception is needed.
 - *Distance to Nearest Lease Line from Bottomhole Location* is measured from the bottomhole location to the nearest point on the external lease line, pooled unit line or interior tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page (See [Section 2.1.3.4](#) for more information about SWR exceptions.)

For applications created before 05/31/2020, this data was entered in *Distance to Nearest Lease Line* in the *Basic Details* section.

2. The *Legal Location* information that displays here applies to the bottomhole location

perpendiculars and has been populated with information entered on the *General Information* page. Change any of the information as needed to describe the location of the actual bottomhole. See [Section 2.1.1](#), Step 10, for instructions on entering surface location information.

3. Enter the *Bottomhole Survey Line Perpendiculars* and the *Bottomhole Lease Line Perpendiculars* distances and directions.
4. If you selected multiple wellbore profiles on the *General Information* tab and this specific *Wellbore Profile* is vertical or horizontal, you need to remove the bottomhole location. Click the check box in the *Delete* column of the *Wellbore Profile* and then click the **Save** button.

NOTE: If you accidentally delete a bottomhole location and need to add the bottomhole location back to the *Wellbore Profile*, click the **Add New Directional** button. The system adds a new *Wellbore Profile* section to the page. You can only add a new bottomhole location after deleting the initial bottomhole location.

2.1.3.3.2 Horizontal Wells

Wellbore Profile

Nearest Distance from Any Take Point to a Lease Line:

Enter Abstract #, select the County and click Auto-Populate, or fill in Survey, Section, and Block manually.

Section:
 Block:
 Survey:

Abstract #: A-
 County:

Additional information about the location:

Delete	Name	Profile	Distance (ft)	Direction	Distance (ft)	Direction	
<input type="checkbox"/>	TH1	Terminus Point	Lease	<input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line	and <input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line
			Survey	<input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line	and <input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line
		Last Take Point	Lease	<input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line	and <input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line
		First Take Point	Lease	<input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line	and <input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line
		Penetration Point	Lease	<input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line	and <input style="width: 50px;" type="text"/> feet	from the <input style="width: 50px;" type="text"/> line

1. For a horizontal wellbore profile, if the application is created on or after 05/31/2020, the data fields for entering take point to lease line distances will be based on whether the permitted field is governed by statewide rules or special field rules. These distances will be used to determine whether a SWR 37 lease line exception is needed.
 - Enter *Nearest Distance from Any Take Point to a Lease Line* if horizontal well spacing for the permitted field is defined by statewide rules, or if the permitted field has special horizontal field rules with the same minimum distance requirements from all take points on the wellbore to a lease line.
 - *Nearest Distance from Any Take Point to a Lease Line* is the distance in feet from the take point within the productive interval that is nearest to the external lease line, pooled unit line or interior tract line. The productive interval begins at the first take point, continues along the course of the wellbore path, and ends at the last take point.
 - If the distance is measured from the well to a pooled unit line instead of an external lease line, and if there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about SWR exceptions.)

For applications created before 05/31/2020, this data was entered in *Distance to Nearest Lease Line* in the *Basic Details* section.

Wellbore Profile

Nearest Distance from the First/Last Take Point (Heel/Toe) to a Lease Line: Nearest Perpendicular Distance from Any Take Point to a Lease Line:

Enter Abstract #, select the County and click Auto-Populate, or fill in Survey, Section, and Block manually.

Section: Block: Survey:

Abstract #: A- County: 

Additional information about the location:

Delete	Name	Profile		Distance (ft)	Direction	Distance (ft)	Direction
<input type="checkbox"/>	TH1	Terminus Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
			Survey	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		Last Take Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		First Take Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		Penetration Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line

- Enter *Nearest Distance from the First/Last Take Point (Heel/Toe) to a Lease Line* and *Nearest Perpendicular Distance from Any Take Point to a Lease Line* if the permitted field has special horizontal field rules with dual lease line take point spacing.
 - *Nearest Distance from the First/Last Take Point (Heel/Toe) to a Lease Line* is the distance in feet from either the first take point (heel) or the last take point (toe) on the wellbore (whichever is closer) to the external lease line, pooled unit line or interior tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about SWR exceptions.)
 - *Nearest Perpendicular Distance from Any Take Point to a Lease Line* is measured in feet as the perpendicular distance (i.e., at a 90-degree angle) from the take point on the wellbore that is nearest to the external lease line, pooled unit line or interior tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, use the nearest point on that unleased tract boundary.
 - If using the nearest point on an unleased tract boundary results in a SWR 37 exception, mark it as an interior lease line 37 exception in the *Statewide Rule Exceptions* section of the page. (See [Section 2.1.3.4](#) for more information about SWR exceptions.)

NOTE: Dual lease line take point spacing is the term used when the special horizontal field rules define different required minimum distances for take points as follows:

1. First (heel) and last (toe) take points to lease line along the axis of the wellbore
2. For all take points, perpendicular spacing (at a 90-degree angle) from the well to the lease line.

For more information about special horizontal field rules, see [Section 3.2.1](#) or [Section 3.2.2](#).

2. For a horizontal wellbore profile, the *Legal Location* information that displays here applies to the terminus point location perpendiculars and has been populated with information entered on the *General Information* page. Change any of the information as needed to describe the location of the actual terminus point. See [Section 2.1.1](#), Step 10, for instructions on entering surface location information.
3. Enter the *Terminus Point Survey Line Perpendiculars* and the *Terminus Point Lease Line Perpendiculars* distances and directions. Then enter the *Last Take Point Lease Line Perpendiculars* and *First Take Point Lease Line Perpendiculars*. Then enter the *Penetration Point Lease Line Perpendiculars* distances and directions.

NOTE: For horizontal wellbore profiles with off-lease penetration points, the penetration point is measured from the survey line instead of the lease line.

Delete	Name	Profile	Distance (ft)	Direction	Distance (ft)	Direction	
<input type="checkbox"/>	TH1	Terminus Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
			Survey	0.0 <input type="text"/> feet	from the <input type="text"/> line	and 0.0 <input type="text"/> feet	from the <input type="text"/> line
		Last Take Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		First Take Point	Lease	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line
		Penetration Point	Survey	<input type="text"/> feet	from the <input type="text"/> line	and <input type="text"/> feet	from the <input type="text"/> line

4. If the well requires more than one terminus location be defined, click the **Add Additional Terminus Location** button. The system adds another *Wellbore Profile* section to the page. The name is the same as the first profile, sequentially numbered. For example, if the first profile was named *TH1*, the second profile is *TH2*, the third is *TH3*, and so on. The new wellbore section is populated with the information from the first profile (if it has been entered). Change any information as necessary.

NOTE: The *Basic Details* section must be completed before you can add an additional terminus location.

- If you selected multiple wellbore profiles on the *General Information* tab and this specific *Wellbore Profile* is vertical or directional, you need to remove the terminus location. Click the check box in the *Delete* column of the *Wellbore Profile* and then click the **Save** button.

2.1.3.4 Off-lease Penetration Point Resolution

The *Resolution Explanation – Off-lease Penetration Point* section of the *Field Details* page allows you to specify the resolution for a field that has an off-lease penetration point.

This section only displays when you select **Yes** for *Off-lease Penetration Point* for the field on the *Field List* page.

Resolution Explanation - Off-lease Penetration Point	
Resolution	Explanation
<input type="checkbox"/> Own Offset	You have indicated on the plat that you are the only affected party.
<input type="checkbox"/> Waivers	Attach a signed waiver for any party you have identified as requiring notification.
<input type="checkbox"/> Notices	<div style="display: flex; align-items: flex-start;"> <div style="flex: 1;"> <p>Last Notification Date: <input type="text"/> (MM/DD/YYYY)</p> </div> <div style="flex: 2; font-size: small;"> <p>Attach a copy of the notice and plat that were sent to affected parties. Also attach a copy of each return receipt for affected parties. Provide the date that the last notice was received by an affected party, and do not submit your application until 21 days after the last notification received date.</p> </div> </div>
<input type="checkbox"/> Publication	You have indicated that you have made a good faith effort to determine all affected parties. As specified in SWR 1.43, attach a copy of the notice that was published and a plat, as well as a publishers affidavit.
<input type="checkbox"/> Hearing Requested	If you have not been able to come to an agreement with affected parties, you may request a hearing. Attach a hearing service list that includes all affected parties.
Docket Number (99-9999999) : <input type="text"/> Hearing Outcome: <input type="text" value="Not Applicable"/>	

- Identify affected parties that require notification.

Affected parties are defined as all persons with an offsite tract through which the proposed wellbore path traverses from the point of penetration, including

- All designated operators.
- All lessees of record for tracts that have no designated operator.
- All owners of record of unleased mineral interests.

- Select one or more of the following resolution methods:

- Click the **Own Offset** check box if you are the only affected party in the notification area. You have indicated this information on the attached certified plat(s) by placing your operator name as the operator of record of all the identified offsetting tract(s).
- Click the **Waiver** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
- Click the **Notices** check box if you have sent notification to all affected parties. Attach a copy of the notice and plat that were sent to affected parties. Also, attach a copy of each return receipt for affected parties. Provide the date that the last notice was received by an affected party. You will not be able to submit your application before the expiration of the 21-day notice.

NOTE: You must resolve any protests prior to the submission of the permit application. If you cannot reach a resolution, you can request a hearing.

- Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.
 - As specified in SWR 1.43, you must publish a notice once a week for four consecutive weeks in a newspaper of general circulation in the county of the well location.
 - Attach to the permit application a copy of the notice that was published, a plat, and a publishers affidavit.
- Click the **Hearing Requested** check box if you have not been able to come to an agreement with affected parties and would like to request a hearing. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.

NOTE: RRC staff will enter the *Docket Number* and *Hearing Outcome* after the hearing.

2.1.3.5 Statewide Rules

The *Statewide Rule Exceptions* section of the *Field Details* page is used to mark any Statewide Rule exceptions that apply.

Statewide Rule Exceptions

Are you applying for any SWR exceptions? Check all that apply.

SWR 37 Lease Line

SWR 37 Between Well

SWR 37 Interior Lease Line - P12 Must Be Attached

SWR 38

SWR 38(d)(3)

SWR39 - Total Acreage is non-contiguous, separated by something other than ROW

1. Refer to the *Field Rules* at the bottom of the page to determine if the well requires any Statewide Rule exceptions.

For some fields, only Statewide Rules apply.

Save

2. In the *Statewide Rule Exceptions* section, check any exceptions that apply. See [Section 2.1.4](#) for details regarding exceptions.
 - If a SWR 38 exception is needed, the system automatically selects the checkbox by default.
 - If a SWR 37 lease line exception is needed, the system automatically selects the checkbox by default in most cases.
 - If a SWR 37 between well exception is needed, the system automatically selects the checkbox by default in most cases.
 - The system cannot automatically select a between well exception if the permitted field has special field rules with either of the following two conditions:
 - The minimum required distance to the nearest vertical well is different than the minimum required distance to the nearest horizontal well.
 - There is any horizontal well overlap distance approved in the Field Rules.

IMPORTANT: If a Final Order establishes special field rules that the system cannot automatically evaluate for SWR 37 lease line and/or between well exceptions, a message will display on the *Field Details* and *Review* screens. When this message displays, you will need to determine whether an exception is required, and you must select the applicable exception(s) on the *Field Details* page. Otherwise, processing of your application could be delayed.

IMPORTANT: If exceptions are selected, exception fees are assessed during the payment process. Exception fees are nonrefundable as specified in SWR 78.

3. If a selected exception needs to be removed from the application, you must manually remove the exception.
 - If you need to remove an exception that was manually selected, remove the check mark and click **Save**.
 - If the exception was system-calculated, you cannot remove the exception manually until you review the information you provided, correct it if necessary, and click **Save**. Then remove the check mark and click **Save**.

4. Once you finish selecting exceptions, click the **Save** button on the *Field Details* page.
 - Check the message area for any error or information messages that may require your attention.
 - If you have Statewide Rule exceptions, the *Statewide Rule Exceptions* box expands with a place to specify resolutions. See [Section 2.1.3.5](#) for more information about specifying resolutions in this box.

Statewide Rule Exceptions

Are you applying for any SWR exceptions? Check all that apply.

SWR 37 Lease Line
 SWR 37 Between Well
 SWR 37 Interior Lease Line - P12 Must Be Attached
 SWR 38
 SWR 38(d)(3)
 SWR39 - Total Acreage is non-contiguous, separated by something other than ROW
 Enter a resolution here.

Exception	Resolution
Rule 37 Lease Line	Go to exceptions tab
Rule 37 Between Wells	Non-concurrent production wells <input style="width: 100px;" type="text"/> (Lease Name and Well # or Well # Only) OR Entity for Density Docket Number 01- <input style="width: 100px;" type="text"/> OR Go to Exceptions tab

5. After you enter the details for the first field, repeat steps 1 through 4 for any other fields shown on the field list.

The screenshot shows the 'Field Details' page for 'NEWARK, EAST (BARNETT SHALE)'. At the top, there are navigation tabs: 'General Information', 'Field List', 'Field Details' (active), 'Exceptions', 'Attachments', 'Comments', and 'Review'. Below the tabs, the field name is displayed as 'NEWARK, EAST (BARNETT SHALE)' with a dropdown menu and a 'Go' button. A 'Save' button is present with the text '(please hit save to see errors on this page)'. The 'Basic Details' section contains the following information:

Lease name: <input type="text" value="ACME"/>	Well number: <input type="text" value="4H"/>	Distance to Nearest Lease Line: <input type="text" value="3.255"/>
---	--	--

6. Select the field name in the drop-down list at the top of the *Field Details* page.
7. Click the **Go** button. The system displays the selected field on the page.

2.1.3.6 Statewide Rule Exceptions Resolutions

When the *Field Details* page is complete and saved successfully, either specify resolutions for exceptions on this page or go to the *Exceptions* page (See [Section 2.1.4](#) for more information about resolving exceptions on the *Exceptions* page).

You can enter resolutions on the *Field Details* page for the following exceptions:

- SWR 37 Between Wells

Statewide Rule Exceptions	
Are you applying for any SWR exceptions? Check all that apply.	
<input type="checkbox"/> SWR 37 Lease Line	
<input checked="" type="checkbox"/> SWR 37 Between Well	
<input type="checkbox"/> SWR 37 Interior Lease Line - P12 Must Be Attached	
<input type="checkbox"/> SWR 38	
<input type="checkbox"/> SWR 38(d)(3)	
<input type="checkbox"/> SWR39 - Total Acreage is non-contiguous, separated by something other than ROW	
Enter a resolution here.	
Exception	Resolution
Rule 37 Between Wells	Non-concurrent production wells <input type="text"/> (Lease Name and Well # or Well # Only) OR Entity for Density Docket Number 06- <input type="text"/> OR Go to Exceptions tab

To resolve an SWR 37 Between Wells exception on the *Field Details* page, do one of the following:

- Enter *Non-concurrent production wells* information (i.e., lease name and well number or well number only) of any wells in this field that are less than the minimum between-well spacing and that will be shut-in prior to completion of the applied for well.
- Enter the *Entity for Density Docket Number*.

- SWR 38

Statewide Rule Exceptions	
Are you applying for any SWR exceptions? Check all that apply.	
<input type="checkbox"/> SWR 37 Lease Line <input type="checkbox"/> SWR 37 Between Well <input type="checkbox"/> SWR 37 Interior Lease Line - P12 Must Be Attached <input checked="" type="checkbox"/> SWR 38 <input type="checkbox"/> SWR 38(d)(3) <input type="checkbox"/> SWR39 - Total Acreage is non-contiguous, separated by something other than ROW Enter a resolution here.	
Exception	Resolution
Rule 38	Non-concurrent production wells <input type="text"/> (Lease Name and Well # or Well # Only) OR Enter W1A date below(In case of SWR 38 with tolerance acres W1A Date is required) OR Go to Exceptions tab OR Attach SWR 38 Data
W1A date may be entered for SWR 38 exception	
W1A Date: <input type="text"/> (MM/DD/YYYY)	

To resolve an SWR 38 exception on the *Field Details* page, do one of the following:

- Enter *Non-concurrent production wells* information (i.e., lease name and well number or well number only) of any wells in this field to be shut in to bring your effective well count into compliance with the field rules.
- Enter the *W1A Date*. In cases of SWR 38 tolerance acres, the *W1A Date* is required.

- SWR 39

Statewide Rule Exceptions	
Are you applying for any SWR exceptions? Check all that apply.	
<input type="checkbox"/> SWR 37 Lease Line <input type="checkbox"/> SWR 37 Between Well <input type="checkbox"/> SWR 37 Interior Lease Line - P12 Must Be Attached <input type="checkbox"/> SWR 38 <input type="checkbox"/> SWR 38(d)(3) <input checked="" type="checkbox"/> SWR39 - Total Acreage is non-contiguous, separated by something other than ROW Enter a resolution here.	
Exception	Resolution
Rule 39	Docket number or other info <input type="text"/> OR Go to exceptions tab

To resolve an SWR 39 exception on the *Field Details* page, enter the *Docket number or other info*.

You can also resolve these exceptions on the *Exceptions* page. See [Section 2.1.4](#) for more information.

If there are no exceptions, click the **Attachments** tab to add attachments for the permit application.

The next section describes potential resolutions to all exceptions on the *Exceptions* page.

2.1.4 Exceptions Page

If after completing the *Field Details* page, the system determines there are exceptions or you manually select exceptions, an *Exceptions* tab is added at the top.

If there are no exceptions to resolve, there is no *Exceptions* tab.

A Statewide Rule exception can be denoted in two ways:

- The permitting application compares the spacing and density pattern from the data entered to the field rules in effect and determines if the location complies with the spacing and density rules for the specific field (i.e., the location is “regular”).
- You can click on one or more of the check boxes shown in the Statewide Rule list. In some cases, the program cannot calculate the exception (e.g., a SWR 37 Interior Lease Line exception or a SWR 39). And, in a few cases, the field is governed by spacing and density requirements that do not fit into the general format. These are referred to as “manual review fields.”

In those cases where this is not possible by comparing the data entered with the field rules, you are responsible for checking the appropriate SWR box. If you know you have an exception that was not caught by calculation, check the appropriate SWR box.

Rule exceptions are:

- SWR 37 Lease Line exception
- SWR 37 Between Well exception
- SWR 37 Interior Lease Line exception
- SWR 38 exception
- SWR 38(d)(3) exception
- SWR 39 exception

If you did not resolve the exceptions on the *Field Details* page, click the **Exceptions** tab to access the *Exceptions* page. The image below shows the potential resolutions as displayed on the *Exceptions* page.

The screenshot shows a web interface with a navigation bar at the top containing tabs: General Information, Field List, Field Details, Exceptions, Attachments, Comments, and Review. Below the navigation bar is a 'Save' button with the text '(please hit save to see errors on this page)'. A table lists exceptions for three fields: NEWARK, EAST (BARNETT SHALE) with SWR 37 Lease Line; BELLEVUE (BARNETT SHALE) with SWR 37 Lease Line; and BELLEVUE (BARNETT SHALE) with SWR 37 Between Well. Below this is a 'Resolution Explanation' section with a table of options:

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s) Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List You have indicated that a Notification of Application for this W-1 is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/duo diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

At the bottom of the form is another 'Save' button.

The following sections explain how to resolve exceptions on the *Exceptions* page.

2.1.4.1 SWR 37 Lease Line Exception

To resolve a *SWR 37 Lease Line* exception on the *Exceptions* page:

1. Identify affected parties that require notification.
 - Affected parties are defined as all persons with a tract closer to the well location than the greater of one-half of the minimum between-well spacing distance or the minimum lease-line spacing distance, including:
 - All designated operators.
 - All lessees of record for tracts that have no designated operator.
 - All owners of record of unleased mineral interests.
 - When you are applying for a permit with multiple fields that require a lease line spacing exception, use the **strictest** field rules to determine the notification area. For example, you are applying for a permit on two fields. Field A requires 1200 feet minimum between-well spacing, and Field B requires 2640 feet minimum between-well spacing. You must notify all affected parties located within 1320 feet of the subject well (one-half of 2640 minimum between-well spacing).

2. Click the **Exceptions** tab. The *Exceptions* page displays.

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s) Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List You have indicated that a Notification of Application for this W-1 is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/due diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

3. On the *Exceptions* page, select one or more of the following resolution methods from the *Resolution Explanation* table:

- Click the **Own Offset** check box if you have indicated that you are the designated operator for all acreage in the notification area. You have indicated this information on the attached certified plat(s) by placing your operator name as the operator of record of all the identified offsetting tract(s).
- Click the **Waivers** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
- Click the **Service List** check box if the Commission needs to issue a Notification of Application to all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach a service list with names and mailing addresses of affected persons, including the applying operator.
- Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a letter stating that you are unable, after due diligence, to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a service list with names and mailing addresses of all affected persons, including the applying operator.
 - As specified in SWR 3.37, you must publish a Commission-supplied notice once a week for two consecutive weeks in a newspaper of general circulation in the county of the well location.

- At the end of this publication period, you must submit to the Commission a publisher’s affidavit that records this publication. E-mail a scanned image of this affidavit to: SWR37@rrc.texas.gov, or mail a hard copy of the affidavit to Railroad Commission of Texas, Drilling Permits Section, P.O. Box 12967, Austin TX 78701.
- For an application requiring publication, the normal application period is approximately six weeks.
- Your permit is NOT granted until the publishers affidavit is received.
- Click the **Hearing Requested** check box if, in good faith, you anticipate a protest to the application. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.

4. Click the **Save** button.

5.

2.1.4.2 SWR 37 Between Well Exception

To resolve a *SWR 37 Between Well* exception on the *Exceptions* page:

1. Identify affected parties that require notification.
 - Affected parties are defined as all persons with an adjacent offset tract and those with a tract closer to the well location than the greater of one-half of the minimum between-well spacing distance or the minimum lease-line spacing distance, including:
 - All designated operators.
 - All lessees of record for tracts that have no designated operator.
 - All owners of record of unleased mineral interests
 - When you are applying for a permit with multiple fields that require a between-well spacing exception, use the **strictest** field rules to determine the notification area. For example, field rules for Field A specify 467 feet minimum lease-line spacing and 1200 feet minimum between-well spacing. Field rules for Field B specify 660 feet minimum lease-line spacing and 0 feet minimum between-well spacing. You must notify all affected parties in all adjacent tracts to your lease and all tracts that are within 660 feet of your well location.

2. Click the **Exceptions** tab. The *Exceptions* page displays.

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s). Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List. You have indicated that a Notification of Application for this W-1 is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/due diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed. This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed. If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

3. On the *Exceptions* page, select one or more of the following resolution methods from the *Resolution Explanation* table:

- Click the **Own Offset** check box if you have indicated that you are the designated operator for all tracts within the notification area. You have indicated this information on the attached certified plat(s) by placing your operator name as the operator of record of all the identified offsetting tract(s).
- Click the **Waivers** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
- Click the **Service List** check box if the Commission needs to issue a Notification of Application to all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach a service list with names and mailing addresses of all affected persons, including the applying operator.
- Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a letter stating that you are unable, after due diligence, to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a service list with names and mailing addresses of all affected parties, including the applying operator.
 - As specified in SWR 3.37, you must publish a Commission-supplied notice once a week for two consecutive weeks in a newspaper of general circulation in the county of the well location.
 - At the end of this publication period, you must submit to the Commission a publishers affidavit that records this publication. E-mail a scanned image of this affidavit to: SWR37@rrc.texas.gov, or mail a hard copy of the affidavit to Railroad Commission of Texas, Drilling Permits Section, P.O. Box 12967, Austin TX 78701.

- For an application requiring publication, please be aware that the normal application period is approximately six weeks.
 - Your permit is NOT granted until the publishers affidavit is received.
 - Click the **Unaffected** check box if there are parties within the notification area that may not be affected because the distance between the proposed well location and the affected tracts is greater than one mile.
 - Attach a certified plat with a radius of at least one mile or more around the proposed well location. Make sure all parties within the notification area have been identified on the plat.
 - Attach a letter requesting that identified parties beyond the radius be deemed unaffected.
 - If the well location tract does not meet this distance requirement, supporting engineering data can be submitted. Contact the [Drilling Permits section](#) for more information about acceptable engineering data.
 - Click the **Hearing Requested** check box, if in good faith, you anticipate a protest to the permit application. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.
4. Click the **Save** button.

2.1.4.3 SWR 37 Interior Lease Line Exception

To resolve a *SWR 37 Interior Lease Line* exception on the *Exceptions* page:

NOTE: When applying for a *SWR 37 Interior Lease Line* exception, you are required to attach a P-12 to your permit application.

1. Identify affected parties that require notification.
 - Affected parties are defined as all persons with a tract closer to the well location than the greater of one-half of the minimum between-well spacing distance or the minimum lease-line spacing distance, including:
 - All designated operators.
 - All lessees of record for tracts that have no designated operator.
 - All owners of record of unleased mineral interests.
 - When you are applying for a permit with multiple fields that require an interior lease line spacing exception, use the **strictest** field rules to determine the notification area. For example, you are applying for a permit on two fields. Field A requires 1200 feet minimum between-well spacing, and Field B requires 2640 feet minimum between-well spacing. You must notify all affected parties located within 1320 feet of the subject well (one-half of 2640 minimum between-well spacing).
2. Click the **Exceptions** tab. The *Exceptions* page displays.

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s) Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List You have indicated that a Notification of Application for this W-I is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/due diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

3. On the *Exceptions* page, select one or more of the following resolution methods from the *Resolution Explanation* table:
 - Click the **Own Offset** check box if you have indicated that you are the designated operator for all acreage in the notification area. You have indicated this information on the attached certified plat(s) by placing your operator name as the operator of record of all the identified offsetting tract(s).

- Click the **Waivers** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
- Click the **Service List** check box if the Commission needs to issue a Notification of Application to all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach a service list with names and mailing addresses of affected persons, including the applying operator.
- Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a letter stating that you are unable, after due diligence, to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a service list with names and mailing addresses of all affected persons, including the applying operator.
 - As specified in SWR 3.37, you must publish a Commission-supplied notice once a week for two consecutive weeks in a newspaper of general circulation in the county of the well location.
 - At the end of this publication period, you must submit to the Commission a publishers affidavit that records this publication. E-mail a scanned image of this affidavit to: SWR37@rrc.texas.gov, or mail a hard copy of the affidavit to Railroad Commission of Texas, Drilling Permits Section, P.O. Box 12967, Austin TX 78701.
 - For an application requiring publication, the normal application period is approximately six weeks.
 - Your permit is NOT granted until the publishers affidavit is received.
- Click the **Hearing Requested** check box if, in good faith, you anticipate a protest to the application. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.

4. Click the **Save** button.

2.1.4.4 SWR 38 Exception

To resolve a *SWR 38* exception on the *Exceptions* page:

1. Identify affected parties that require notification.
 - Affected parties are defined as all persons with an adjacent offset tract and those with a tract closer to the well location than the minimum lease-line spacing distance, including:
 - All designated operators.
 - All lessees of record for tracts that have no designated operator.
 - All owners of record of unleased mineral interests.
 - When you are applying for a permit with multiple fields that require a well density exception, use the **strictest** field rules to determine the notification area. For example, field rules for Field A specify 467 feet minimum lease-line spacing. Field rules for Field B specify 660 feet minimum lease-line spacing. You must notify all affected parties in all adjacent tracts to your lease and all tracts that are within 660 feet of your well location.
 - If you want to use different notification parameters than the ones specified in *SWR 38*, select **Yes** in the *SWR 38 Exception Notification Parameters* section.
 - To qualify for different notification parameters, **all** of the fields with a *SWR 38* exception listed on the *Exceptions* page must be designated as unconventional fracture treated (UFT) or have a notification radius specified in special field rules.
 - If the system validates that the permit application qualifies for different notification parameters than the ones specified in *SWR 38*, provide a resolution option that corresponds to those parameters.
 - If the permit application does not qualify for different notification parameters, provide a resolution option that corresponds to the parameters specified in *SWR 38*.
In addition, you must also attach geological evidence (i.e., *SWR 38* data) supporting your request. See [Appendix E](#) for more information.

2. Click the **Exceptions** tab. The *Exceptions* page displays.

Save

3. On the *Exceptions* page, select one or more of the following resolution methods from the *Resolution Explanation* table:

- Click the **Own Offset** check box if you have indicated that you are the designated operator for all tracts within the notification area. You have indicated this information on the attached certified plat(s) by placing your operator name as the operator of record of all the identified offsetting tract(s).
- Click the **Waivers** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
- Click the **Service List** check box if the Commission needs to issue a Notification of Application to all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach a service list with names and mailing addresses of all affected persons, including the applying operator.
- Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a letter stating that you are unable, after due diligence, to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a service list with names and mailing addresses of all affected parties, including the applying operator.
 - As specified in SWR 3.38, you must publish a Commission-supplied notice once a week for two consecutive weeks in a newspaper of general circulation in the county of the well location.

- At the end of this publication period, you must submit to the Commission a publishers affidavit that records this publication. E-mail a scanned image of this affidavit to: SWR37@rrc.texas.gov, or mail a hard copy of the affidavit to Railroad Commission of Texas, Drilling Permits Section, P.O. Box 12967, Austin TX 78701.
 - For an application requiring publication, please be aware that the normal application period is approximately six weeks.
 - Your permit is NOT granted until the publishers affidavit is received.
 - Click the **Unaffected** check box if there are parties within the notification area that may not be affected because the distance between the proposed well location and the affected tracts is greater than one mile.
 - Attach a certified plat with a radius of at least one mile or more around the proposed well location. Make sure all parties within the notification area have been identified on the plat.
 - Attach a letter requesting that identified parties beyond the radius be deemed unaffected.
 - If the well location tract does not meet this distance requirement, supporting engineering data can be submitted. Contact the [Drilling Permits section](#) for more information about acceptable engineering data.
 - Click the **Hearing Requested** check box, if in good faith, you anticipate a protest to the permit application. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.
4. Click the **Save** button.

2.1.4.5 SWR 38(d)(3) Exception

To resolve a *SWR 38(d)(3)* exception on the *Exceptions* page:

1. Identify affected parties that require notification.
 - Affected parties are defined as all persons having a tract within the pooled unit or unitized tract at the time the application is filed. Additionally, if one or more wells on the unitized tract have produced from the field within the 12 month period prior to the application, affected persons include those with an adjacent offset tract and those with a tract closer to the well than the minimum lease-line spacing distance, including:
 - All designated operators.
 - All lessees of record for tracts that have no designated operator.
 - All owners of record of unleased mineral interests.
2. Click the **Exceptions** tab. The *Exceptions* page displays.

The screenshot shows the 'Exceptions' tab selected in a web application. At the top, there are navigation tabs: 'General Information', 'Field List', 'Field Details', 'Exceptions', 'Attachments', 'Comments', and 'Review'. Below the tabs is a 'Save' button with the text '(please hit save to see errors on this page)'. A table shows the current field and exception: 'SMILEY (AUSTIN CHALK)' and 'SWR 38(d)(3)'. Below this is the 'Resolution Explanation' section, which contains a table with columns for 'Resolution' and 'Explanation'. The table lists several resolution options, each with a checkbox and a description of the required action.

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s) Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List You have indicated that a Notification of Application for this W-1 is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/due diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

3. On the *Exceptions* page, select one or more of the following resolution methods from the *Resolution Explanation* table:
 - Click the **Waivers** check box if you are submitting waivers from all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach scanned images of the waivers.
 - Click the **Service List** check box if the Commission needs to issue a Notification of Application to all affected parties. The attached certified plat(s) must reference all affected parties you have identified. Attach a service list with names and mailing addresses of affected persons, including the applying operator.
 - Click the **Publication** check box if you have made a good faith effort to determine all affected parties to receive notice but were unable to locate the whereabouts of one or more persons who are required to be notified of an application.

- Attach a letter stating that you are unable, after due diligence, to locate the whereabouts of one or more persons who are required to be notified of an application.
 - Attach a service list with names and mailing addresses of all affected persons, including the applying operator.
 - As specified in SWR 3.38, you must publish a Commission-supplied notice once a week for two consecutive weeks in a newspaper of general circulation in the county of the well location.
 - At the end of this publication period, you must submit to the Commission a publishers affidavit that records this publication. E-mail a scanned image of this affidavit to: SWR37@rrc.texas.gov, or mail a hard copy of the affidavit to Railroad Commission of Texas, Drilling Permits Section, P.O. Box 12967, Austin TX 78701.
 - For an application requiring publication, please be aware that the normal application period is approximately six weeks.
 - Your permit is NOT granted until the publishers affidavit is received.
 - Click the **Hearing Requested** check box, if in good faith, you anticipate a protest to the permit application. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.
4. Click the **Save** button.

2.1.4.6 SWR 39 Exception

To resolve a SWR 39 exception:

1. If a SWR 39 exception was previously granted for this lease, enter the *Docket Number* or memo date granting the exception on the *Field Details* page. See [Section 2.1.3.5](#) for more information about resolving a SWR 39 exception on the *Field Details* page.
2. If a SWR 39 exception was not previously granted for this lease:
 - a. Click the **Exceptions** tab. The *Exceptions* page displays.

Field	Exception
SMILEY (AUSTIN CHALK)	SWR 39

Resolution	Explanation
<input type="checkbox"/> Own Offset	None needed. You have indicated that your application meets specific criteria.
<input type="checkbox"/> Waivers	Attach Waiver(s) Verify the criteria for waivers then attach the scanned images using the Attachments tab.
<input type="checkbox"/> Service List	Attach Service List You have indicated that a Notification of Application for this W-1 is necessary. Pursuant to the applicable rule, the Commission will issue these notifications to all parties on the service list. Be sure to list the applying operator on the service list. Specific formatting instructions and file types are required.
<input type="checkbox"/> Publication	Instructions will be sent to your email address. You have indicated that you have made a good faith effort/due diligence search to determine all entities to receive notice and the attached service list is incomplete because addresses are missing or are inadequate. You must also check the Service List box and attach a service list along with this option.
<input type="checkbox"/> Unaffected	None needed This resolution is only applicable to SWR 37 between-well exceptions or SWR 38 exceptions.
<input type="checkbox"/> Hearing Requested	None needed If, in good faith, you anticipate a protest to the application, you may request it be set immediately for hearing.

- b. On the *Exceptions* tab, click the **Hearing Requested** check box.
- c. Attach a hearing service list with names and mailing addresses of all affected parties, including the applying operator.

NOTE: To determine affected parties, refer to the notification requirements for a SWR 38 exception. See [Section 2.1.4.4](#) for more information.

- d. Click the **Save** button.

NOTE: A SWR 39 exception can be granted administratively only when the tracts involved are separated by a long, narrow right-of-way such as a road or railroad line.

2.1.5 Attachments Page

Except for Service Lists, attachments that support a drilling permit application must be in PDF or TIF format.

IMPORTANT: TIFF format is not accepted.

Service List attachments are accepted in the following formats:

- CSV (Microsoft Access Comma Separated Values)
- DOC (Microsoft Word 97-2003)
- DOCX (Microsoft Word)
- PDF
- TIF

IMPORTANT: TIFF format is not accepted.

Attachments can be a maximum of 4MB in size.

All scanned images should be scanned on a flatbed scanner with a resolution sufficient to ensure that all the text is readable in the image (200 or 300 dpi is usually fine). Be certain the plat is correctly aligned to be flush with corners. A 24-bit size is the minimum acceptable.

Multiple page forms such as Form P-12, *Pooling Authority*, may be either one image of multiple pages (possible if using a multi-page scanner) or consist of several separate image files.

Select the **Attachments** tab. If there are currently no attachments associated with the permit, the *Attachments* page contains no information.

Attachment Type	Name/Size	Associations	Delete
-----------------	-----------	--------------	--------

The message area at the top of the page lists what attachments are required for a complete permit application.

1. Select the type of attachment you are uploading (e.g., log, plat, P-12, SWR 38 data, service list, W-1A, or other) and click the **Submit** button. The system redisplay the page with a *Select Attachment to Upload* data field.

General Information | Field List | Field Details | Exceptions | **Attachments** | Comments | Review

Select the type of attachment to upload : PLAT

Select Attachment to Upload :

Please Select Paper Size : Letter Legal Ledger Over Size

Attachment Type	Name/Size	Associations

- Locate the file to be uploaded using one of the following methods:
 - Enter a complete path and file name in the text box.
 - Click the **Browse** button. In the *Choose File* dialog box, navigate to and select the file, and click the **Open** button.
- If the attachment is a plat, select the paper size of the hardcopy version to ensure the plat will print at the correct scale during application review. Plats can be letter (8 ½ by 11), legal (8 ½ by 14), or ledger (11 by 17) size. For plats of a larger size, contact the [Drilling Permits section](#).
- Click the **Upload** button. The attachment type and file name display in the attachments table after the file is successfully uploaded. (Click the **Cancel** button to cancel the attachment action.)

File Upload Successful

General Information | Field List | Field Details | Exceptions | **Attachments** | Comments | Review

Select the type of attachment to upload : PLAT

Select Attachment to Upload :

Please Select Paper Size : Letter Legal Ledger Over Size

Attachment Type	Name/Size	Associations	Delete
PLAT #1	File Name: TestPlatOne.tif Paper Size:LTR	Fields: deselect all <input checked="" type="checkbox"/> BELLEVUE (BARNETT SHALE) <input checked="" type="checkbox"/> NEWARK, EAST (BARNETT SHALE)	<input type="checkbox"/>

NOTE: If the system kicks you out and fails to attach the file, confirm that the file name does not contain special characters (i.e., ..., &, *, #, etc.). The system does not recognize special characters as part of a file name and rejects your attachment. Also, the system generates an error when the file name contains more than 80 characters.

Attachment Type	Name/Size	Associations	Delete
PLAT #1	File Name: <u>TestPlatOne.tif</u> Paper Size:LTR	Fields: deselect all <input checked="" type="checkbox"/> BELLEVUE (BARNETT SHALE) <input checked="" type="checkbox"/> NEWARK, EAST (BARNETT SHALE)	<input type="checkbox"/>

5. If you need to remove the association of a field from an uploaded plat, click the field check box in the *Associations* column.

An uploaded plat is initially associated with all the fields on the application. All fields must be associated with at least one plat and, conversely, all plats must be associated with a field.

6. If you need to create a new service list in the CSV format:
 - a. Use the drop-down list to select **Service List** as the type of attachment.
 - b. Click the **Create New Service List** button. The *Service List* section displays.

• A Service List needs to be attached

[General Information](#) | [Field List](#) | [Field Details](#) | [Exceptions](#) | **[Attachments](#)** | [Comments](#) | [Review](#)

d. When you have entered all the parties on the Service List, click **Return**.

The system automatically creates and names the CSV file. As shown in the image below, the created Service List displays in the list of uploaded attachments.

General Information | Field List | Field Details | Exceptions | **Attachments** | Comments | Review

Select the type of attachment to upload : None Selected

Select Attachment to Upload : No file chosen

Attachment Type	Name/Size	Associations	Delete
PLAT #1	File Name: Sample attachment in PDF format.pdf Paper Size:OSZ	Fields: deselect all <input checked="" type="checkbox"/> PHANTOM (WOLFCAMP)	<input type="checkbox"/>
P-16	File Name: Sample P-16 attachment.tif		<input type="checkbox"/>
Service List	File Name: rncServiceList-179.csv edit		<input type="checkbox"/>

7. You can remove any of the attachments from the permit application by clicking the check box in the *Delete* column next to the attachment.

NOTE: If there is a field you want to delete from the permit application, you must first delete any attachments associated with it.

8. You can view an attachment at any time by clicking on the file name link.

9. After all attachments are uploaded or deleted and plats are associated with the correct field, click the **Save** button.

Next, go to the *Comments* page to enter remarks.

2.1.6 Comments Page

The *Comments* page provides a place to enter any remarks that would assist in the approval process. You can have only one comment. The text that appears in the *Comment* box accompanies the W-1 when it is submitted. Select the **Comments** tab.

The screenshot shows the 'Form W-1: Comments' page. At the top, there is a header with the following information: Status #, API #, Tracking # 489874266; OP # [redacted] - [redacted] COMPANY II, LLC, Work In Progress, Created: 12/11/2015, Filed: Online; ACME - Well # 4H, 09 - DENTON County; and New Drill Horizontal. Below the header is a navigation bar with tabs: General Information, Field List, Field Details, Exceptions, Attachments, Comments (selected), and Review. The main content area is titled 'Add a Comment' and contains the instruction 'Enter your comment in the following text box:'. Below this is a text input field containing the text 'Comment regarding this drilling permit application.' and a 'Save' button.

1. Click inside the *Comments* text box and enter your remarks.
2. Click the **Save** button. The system returns the *Comments* page with the comment displayed at the top of the page, under the heading. The system displays the comment at the top of every permit application page.

The screenshot shows the 'Form W-1: Comments' page after the comment has been saved. The header and navigation bar are the same as in the previous screenshot. The main content area now displays the comment 'Comment regarding this drilling permit a (12/14/2015 10:31:59 AM)' at the top. Below the comment is a 'Save Successful' message. The 'Add a Comment' section is still visible, showing the same text input field and 'Save' button.

Next, go to the *Review* page to review all data entered for the permit.

2.1.7 Review Page

Select the **Review** tab. This page is a compilation of all the data entered on the permit:

- The left column shows the validation status of a specific set of information such as the general/location information, attachments, or exceptions. Also provided in this column is an *Edit* link, for quick access to the specific area. The validation status is displayed as either a red triangle  indicating that the area has not passed validation or a check mark  indicating the area has passed validation. Until all areas show a check mark, the permit cannot be submitted.

NOTE: 1) The check mark  does not indicate that the entered information is correct. The system only validates that all data fields are complete and that the entered information does not conflict with the system's business rules. It is the applicant's responsibility to ensure that the entered data is correct to minimize problems in permit processing that may delay the issuance of the permit. **2)** You can click on the **View Current W-1** link and use the W-1 replica to review your online data closely to ensure that all information is correct.

- The right column displays the actual data entered. Editing is not allowed from the *Review* page. While the permit has a status of *Work In Progress*, each section of the *Review* page has an *Edit* link that when clicked, takes you to the page for that section.
1. Details can only be edited on the pages from which they were entered. If a section of the *Review* page shows the problem flag , click the **Edit** link to go to the particular editable page.
 2. If the application includes fields with special field rules, go to the *Field Details* page to confirm that you do not need to indicate an SWR 37 exception.
 3. After all problems have been resolved and each area on the *Review* page shows a check mark , click the **Submit W-1** button. The permit application is submitted.

Surface Lines	480.0 feet	from the South line and	335.0 feet	from the East line

Permit Restrictions:

Code	Description
29	This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

Fields

The field you are attempting to permit in will require the filer to determine if a SWR 37 exception is needed. If an exception will be needed please check the SWR 37 box in the field details page so the application can charge you for the exception. Failure to properly set up the application will increase the processing time.

2.1.8 Payment

When the W-1 is error-free and submitted, the system displays the *Payment Method* page.

Payment Method Page

Status # API # Tracking # 490198401	OP # Work In Progress ,Created: 11/03/2016 ,Filed: Online	Well # 1H 08 - PECOS County	New Drill Horizontal
--	---	---------------------------------------	--------------------------------

Commission Staff expresses no opinion as (12/01/2016 02:55:34 PM)

Please select your choice of payment:

Credit Card Electronic Check

Refer to the table below for requirements and conditions of each.

Payment Methods:

There are two ways to pay the filing fees associated with your W-1:

- Credit Card (using the State of Texas payment portal)
- Electronic Check (using the State of Texas payment portal)

See the following conditions for each method:

Payment Method	Requires	Additional Information
Credit Card	A valid credit card.	A fee of 2.25% and a fixed fee \$0.26 are added to the cost of the permit.
Electronic Check	A valid checking or savings account.	Effective 12/1/2016, a fixed fee of \$1 that is added to the cost of the permit will be decreased to 25 cents.

1. Select **Credit Card** or **Electronic Check** as the payment method. The *Payment* page displays.

Form W-1: Payment

Status # API # Tracking # 490198401	OP # Work In Progress ,Created: 11/03/2016 ,Filed: Online	Well # 1H 08 - PECOS County	New Drill Horizontal
--	---	---------------------------------------	--------------------------------

Commission Staff expresses no opinion as (12/01/2016 02:55:34 PM)

Please make sure the Purpose of Filing is correct. If the application is being filed at the request of the RRC, make sure that this application, as filed, satisfies the request. If the application is filed incorrectly all fees may be lost, and you will be required to refile.

Texas.gov Price: \$ 1250.25

\$750.00	This is a basic fee for a W-1 application to drill a well at a depth greater than 9000'.
\$500.00	This is an additional W-1 application fee when requesting an exception to SWR 37 or 38

Texas.gov Price - This online service is provided by Texas.gov, the official website of Texas. The price of this service includes funds that support the ongoing operations and enhancements of Texas.gov, which is provided by a third party in partnership with the State.

The country of domicile for this transaction is the U.S.A.

(Pursuant to SWR 78(b)(1), this payment is a **non-refundable** fee.)

Click the **Make Payment** button above to proceed to the State Payment Portal secure site for processing your payment. To ensure a completed transaction, please wait for verification of payment processing before proceeding. Upon completion of the transaction, you will receive a return page with a **trace number** and **authorization information**.

Notice:

You need an **Internet Browser** that supports **128-bit security** in order to enter this area of the site without errors. The State Payment Portal requires this high level of security to help protect your personal and financial information. The earliest browser versions from Microsoft and Netscape that support this level of security are:

- Microsoft Internet Explorer, version 4.0 or greater
- or
- Netscape Navigator, version 4.0 or greater

To determine the version of Microsoft or Netscape browser that you have, click on the Help tab on the toolbar at the top of your browser page and select either "About Internet Explorer" or "About Communicator." If you wish to upgrade your browser to a version that supports 128-bit security, you may also visit either of the following websites to download the current version of the browser you wish to use:

www.netscape.com
www.microsoft.com

The *Texas.gov Price* (total payment amount) is indicated, along with an itemized breakdown of the fees. The drilling depth determines the permitting fee. There can be additional fees for exceptions to Statewide Rules, and there is a Payment Portal convenience fee.

NOTE: Before making a payment, confirm that the purpose of filing is correct and that the application is still needed. Once you make a payment for the application, you cannot receive a refund for an incorrect or unnecessary application as defined in SWR 78.

NOTE: If you pay with a credit card, the transaction will be assessed using the following formula: $((\text{RRC Amount} + \$0.25) * 0.0225) + \0.25 . For example, if you pay a fee of \$100, the assessment is \$2.51, and you are charged a total of \$102.51.

If you pay with an electronic check, \$.25 will be added to the fee total.

2. Click the **Make Payment** button to proceed to the Texas Online Payment Portal secure site for processing your payment. Read the browser requirements to make sure you are using a browser that supports the level of security in the Payment Portal.
3. Complete the Texas Online Payment Portal pages with your credit card information (the online Payment Portal accepts Visa, MasterCard, American Express, and Discover) or e-check information and click the **Submit** button.

NOTE: The credit card information in step 3 is only for online payments processed through the Payment Portal. If you later need to pay additional fees, you can call the [RRC Public Sales department](#). The RRC Public Sales department only accepts Visa and MasterCard. If you apply for a drilling permit via mail, the RRC accepts Visa, MasterCard and checks.

4. On the *Payment Processed* page, the system displays a success message in the message area indicating that the payment processed successfully along with an authorization number, a trace number, and the total amount paid. If you supplied an email address when you registered to file online, a statement displays that an email was sent to that address, which contained the trace and authorization numbers.

At this point the W-1 is submitted to the Commission and assigned a status number. This status number becomes the permit number once the application is approved. You can track the approval process of your permit using the Drilling Permit Query. (See [Section 3.1](#) for more information about this query.)

If you have a successful payment, but the application remains in the *Work In Progress* list, contact the [RRC Drilling Permits section](#) with the tracking number. The tracking number can be found in the application header.

Status # API # Tracking # 489770481	OP # [REDACTED] - [REDACTED] COMPANY II, LLC Work In Progress ,Created: 11/06/2015 ,Filed: Online	TEST LEASE - Well # 1 06 - TRAVIS County	New Drill Horizontal
---	--	---	-------------------------

2.2 Filing (Recompletion, Reclass, Field Transfer, or Re-enter)

When using the Drilling Permits system to file a W-1, the only difference in filing for a recompletion, reclass, field transfer, or re-enter drilling versus a new drill permit is that an API number is required on the *General Information* page.

NOTE: Required paperwork/attachments may be different for each purpose of filing, for instance, for a Field Transfer. In order to change completion papers after validation, you must apply by letter to Technical Permitting for a Field Transfer. You must show that the well is not in the correct field. Once Technical Permitting approves the field transfer, you must file a new W-1 with **Field Transfer** selected as the *Purpose of Filing* and include a copy of the approved field transfer letter, file a G-2/W-2 noting the field change, and file a P-4 reflecting the change.

Enter the API number using one of the following methods.

- In the *API No.* field, enter the valid API number.
- If you do not know the API number, click the **Search for API** button. The system displays the *API Query* page.

***Surface Location**

API No: Search for API

Surface Location Type:

Distance from nearest town: miles

Direction from nearest town:

Nearest Town (in the county of the well):

Surface Survey/Legal Location Information:
Enter Abstract #, make sure County is selected above and click Auto-Populate, or fill in Survey, Section, and Block manually.

Survey: Section: Block: Abstract #: A- Auto-Populate

Township: League: Labor: Porcion: MAP

Share: Tract: Lot:

Additional information about the location:

Perpendicular surface location from two nearest designated reference lines:

Perpendiculars	Distance	Direction	Distance	Direction
Survey Lines	<input type="text"/> feet	from the <input type="text"/> line and	<input type="text"/> feet	from the <input type="text"/> line

The *API Query* page provides a search by API number or by district and lease number. To search for an API number:

API Query

If no API found, comments identifying the well are required for Reentry filings only. Enter the comments in the text box provided below.

API Number Search:
Find API information by entering the API number
 -

-OR-
District:
None Selected ▼

Lease Number/Gas ID:

-OR-
Reentry only:
If no API found, comments identifying the well are required.

If the API number for this well was not found above,
please enter as much of the following as possible:
original operator name , lease name, well number,
completion date, plug date, total depth,
and/or API number.

Alternate Well Information

Submit Return

1. If you know the API number, enter it.
2. If you do not know the API number, select the *District* for the well and enter the *Lease Number/Gas ID* number.
3. If the well is a reentry, and no API was found, you must enter comments identifying the well in the *Alternate Well Information* field. This information can be the original operator name, lease name, well number, completion date, plug date, total depth, and/or API number.

- Click the **Submit** button. The system either finds the API number or it verifies the API number you entered and displays the surface location type, survey, block, and abstract number of the well site at the bottom of the page.

TIP: Use the **Return** button to return to the *General Information* page without searching for an API number.

Information for API Number 289-30111

Surface Location			
Survey Name:			County: LEON
Abstract #:	Section:	Block:	
Surface Location Survey Lines:			
District: 05	Lease #: 084846	Lease Name:	Well #: 1 A

Save API Number
Save API And Location
Cancel

- To select an API number and return to the *General Information* page, use one of the following methods:
 - Click the **Save API Number** button. The system populates the API number on the *General Information* page.
 - Click the **Save API and Location** button. The system populates the API number and all of the surface location information on the *General Information* page.

TIP: To clear the *API Query* page without selecting an API number, click the **Cancel** button.

2.2.1 Recompletion Permits

You must select **Recompletion** as the *Purpose of Filing* when working over an existing wellbore to complete in a different field/reservoir or deepening the wellbore beyond its original, approved vertical depth in the same field. An API number is required.

General Information
Field List
Attachments
Comments
Review

Save (please hit save to see errors on this page)

***Purpose of Filing**

New Drill
 Recompletion
 Reclass
 Field Transfer
 Reenter

2.2.2 Re-entry Permits

You must select **Reenter** as the *Purpose of Filing* when going back into a wellbore that has been plugged to the surface. An API number is required.

The screenshot shows a web interface with a navigation bar at the top containing tabs for 'General Information', 'Field List', 'Attachments', 'Comments', and 'Review'. Below the navigation bar is a 'Save' button with the text '(please hit save to see errors on this page)'. At the bottom, there is a section titled '*Purpose of Filing' with five radio button options: 'New Drill', 'Recompletion', 'Reclass', 'Field Transfer', and 'Reenter'. The 'Reenter' option is selected and circled in orange.

2.2.3 Field Transfer Permits

You must select **Field Transfer** as the *Purpose of Filing* when transferring a well from one field to another. No work should have been done to the wellbore. An API number is required.

The screenshot shows a web interface with a navigation bar at the top containing tabs for 'General Information', 'Field List', 'Attachments', 'Comments', and 'Review'. Below the navigation bar is a 'Save' button with the text '(please hit save to see errors on this page)'. At the bottom, there is a section titled '*Purpose of Filing' with five radio button options: 'New Drill', 'Recompletion', 'Reclass', 'Field Transfer', and 'Reenter'. The 'Field Transfer' option is selected and circled in orange.

2.2.4 Reclass Permits

You must select **Reclass** as the *Purpose of Filing* when changing an existing well originally permitted only as injection/disposal or other service well to an oil or gas producing well or changing an existing well in the Panhandle East or West fields from oil to gas or gas to oil production. No work should have been done to the wellbore. An API number is required.

The screenshot shows a web interface with a navigation bar at the top containing tabs for 'General Information', 'Field List', 'Attachments', 'Comments', and 'Review'. Below the navigation bar is a 'Save' button with the text '(please hit save to see errors on this page)'. At the bottom, there is a section titled '*Purpose of Filing' with five radio button options: 'New Drill', 'Recompletion', 'Reclass', 'Field Transfer', and 'Reenter'. The 'Reclass' option is selected and circled in orange.

2.3 Amend Approved Permit (W-1)

There are many reasons why an approved permit may require amending. Minor changes such as an operator name change, well number change, or lease name change can be done as an amended permit, or these changes can wait until the time of completion. The main reasons for filing an amended permit are:

- To change the well location.
- To add fields.
- To change the well depth.
- To make the well into a pooled unit or change it from a pooled unit to a standalone.
- To respond to a RRC Engineering Unit request for reasons such as when a directional well runs too close to a lease line.

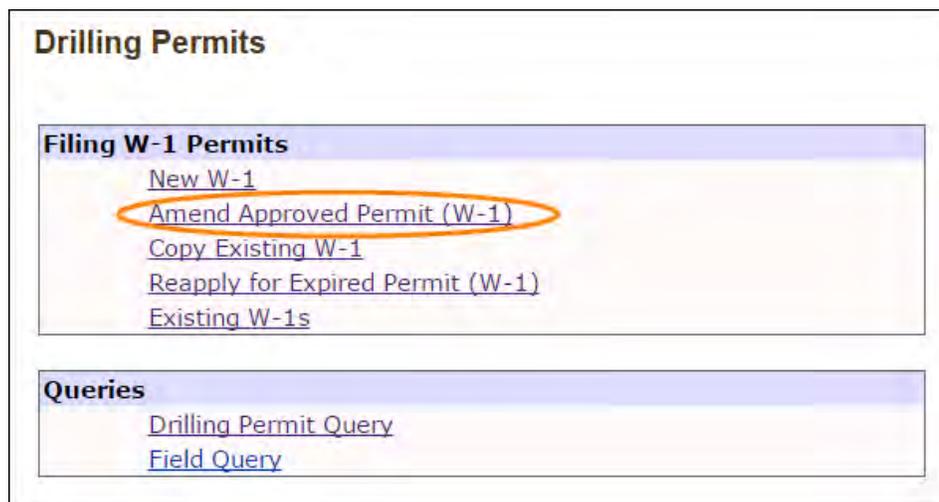

NOTE: If the permit is being amended due to a request from the RRC Engineering Unit or Well Compliance department, attach a screenshot to the amended permit of the email message request from the RRC. The RRC Drilling Permits section may need this information to process the amendment. See [Section 2.1.5](#) for information about attachments.

You can modify any data when amending a permit except for the API number. You should not change the *Purpose of Filing* unless you are amending to show an unintentionally deviated vertical well. You must upload new attachments for the amended permit, and new fees apply to the amended filing.

If you are not sure of the permit number of the permit to be amended, use the Drilling Permit Query to find it. See [Section 3.1](#) for more information about using this query. Be sure that amending an approved permit is the correct action to take.

The following steps describe how to amend an approved permit.

1. Select the **Amend Approved Permit (W-1)** option from the Drilling Permits Main Menu. The system displays the *Amend Approved Permit (W-1)* page.

Amend Approved Permit (W-1)

Amend Approved Permit (W-1)

When to use the Amend feature

Use this option when you want to amend an **approved** permit that has a spud date, or has an issued date less than two years ago. You cannot use this feature for an expired permit.

How to use the Amend feature

Enter the Status/Permit Number of an **approved** permit and click Search. Summary information for the permit and a link to confirm that you want to amend this permit will display. After you click Amend, information from the permit will display. You can modify any of the data except for API Number. You should not change the Purpose of Filing unless you are amending to show an unintentionally deviated vertical well.

If you are amending a permit due to a request from the RRC, attach a screenshot to the amended filing of the email message request from the RRC.

Amend Approved Permit (W-1)

Status/Permit Number:

2. Enter the *Status/Permit Number* to amend.
3. Click the **Search** button. The system redisplay the page showing identifying information for the permit number that was entered.

Important - Before you start this process, verify that this is the correct Permit Number and API Number to amend. Please note that the Permit Number and API Number cannot be modified with the amendment process. If the application is filed incorrectly all fees may be lost, and you will be required to refile.

Date Created	Status/Permit No.	API No.	Operator	Lease	Well #	District	County	Filing Purpose	Wellbore Profile	Total Depth	
2005-04-30 19:58:56.705	600020	000001	RAILROAD COMMISSION DISTRICT 01	PK - PP TEST	22	01	BASTROP	New Drill	Vertical	5000	

4. Click the **Amend** link. The system displays the *General Information* page of the permit.
5. Enter or edit the data as described in the previous sections.

2.3.1 When You Cannot Amend a Drilling Permit

You cannot amend expired or closed drilling permits.

2.3.1.1 Expired Permits

You cannot amend a drilling permit that has expired. If the well is not spudded, a drilling permit expires two years after the date it is approved and issued.

NOTE: If you spudded the well before the permit expired, report the date to your District Office. They will update the Commission's records to reflect an active permit that has not expired.

NOTE: Although you cannot amend an expired permit, you can reapply for the permit. See [Section 2.5](#) for more information about reapplying for an expired permit.

2.3.1.2 Closed Permits

You cannot amend a drilling permit that is closed. For example, a drilling permit is closed after any of the following forms are filed with the Commission:

- *Form W-2 Oil Well Potential Test, Completion or Recompletion Report, and Log*
- *Form G-2 Gas Well Back Pressure Test, Completion or Recompletion Report, and Log*
- *Form W-3 Plugging Report*

To determine whether a permit is closed, use the Drilling Permit Query to view the *Form W-1* page. See [Section 3.1](#) for more information about using this query. As shown in the image below, at the top of the *Form W-1* page, a closed permit has a *Completion Information* section, with a value in the *Well Status Code*.

Completion Information			
Well Status Code	Spud Date	Drilling Completed	Surface Casing Date
W - Final Completion	09/29/2014	10/14/2014	10/01/2014
Field Name	Completed Well Type	Completed Date	Validated Date
SUGARKANE (EAGLE FORD)	Gas	10/14/2014	06/29/2015

NOTE: If you attempt to amend a permit, but the permit is closed, contact the [RRC Well Compliance section](#) to determine whether the permit can be reopened.

2.4 Copy Existing W-1

You can use an existing submitted permit as a starting point (or template) to file a new W-1. This feature is intended as a timesaving convenience to begin a new W-1 application that is a mirror image (or "duplicate" copy) of the significant data from an older W-1 application. This feature proves useful in large multi-well leases/units and in drilling areas where only minor differences (such as depth and surface location) exist between the two applications. Simply change the data that is unique to the current filing. Attachments from the original filing are not copied or attached.

Drilling Permits

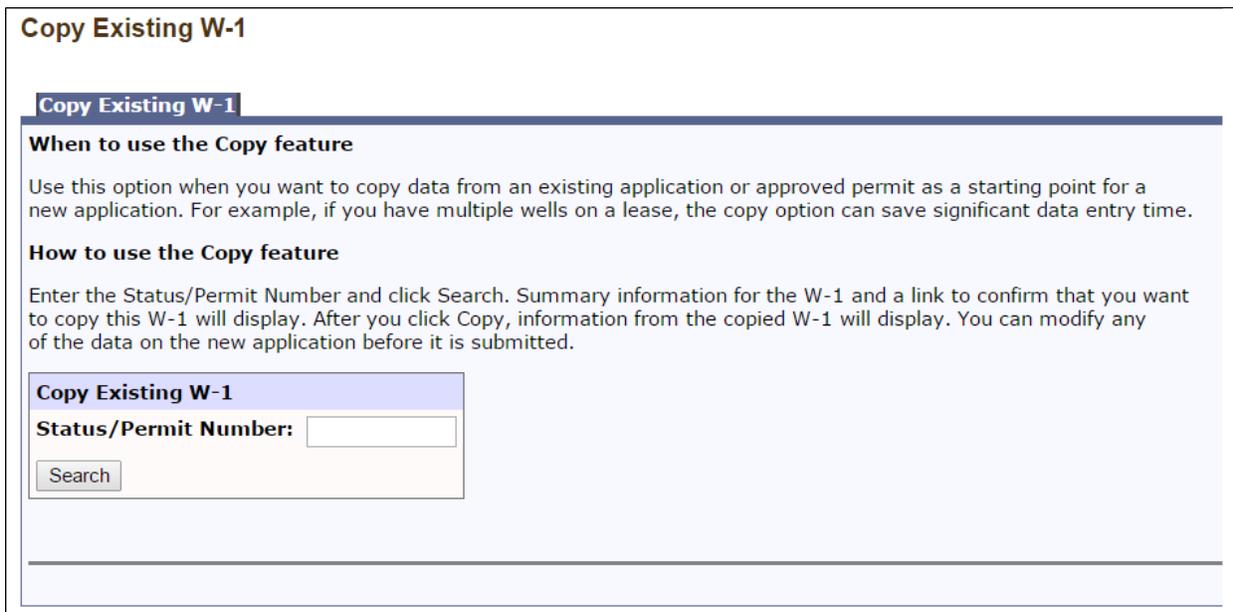

Filing W-1 Permits

Queries

- [Drilling Permit Query](#)
- [Field Query](#)

1. Select the **Copy Existing W-1** option from the Drilling Permits Main Menu. The system displays the *Copy Existing W-1* page.

Copy Existing W-1

When to use the Copy feature

Use this option when you want to copy data from an existing application or approved permit as a starting point for a new application. For example, if you have multiple wells on a lease, the copy option can save significant data entry time.

How to use the Copy feature

Enter the Status/Permit Number and click Search. Summary information for the W-1 and a link to confirm that you want to copy this W-1 will display. After you click Copy, information from the copied W-1 will display. You can modify any of the data on the new application before it is submitted.

Copy Existing W-1

Status/Permit Number:

2. Enter the *Status/Permit Number* to copy.

- Click the **Search** button. The system redisplay the page populated with identifying information for the permit entered.

Copy Existing W-1

Copy Existing W-1

When to use the Copy feature
Use this option when you want to copy data from an existing application or approved permit as a starting point for a new application. For example, if you have multiple wells on a lease, the copy option can save significant data entry time.

How to use the Copy feature
Enter the Status/Permit Number and click Search. Summary information for the W-1, and a link to confirm that you want to copy this W-1 will display. After you click Copy, information from the copied W-1 will display. You can modify any of the data on the new application before it is submitted.

Copy Existing W-1
Status/Permit Number: 600020
Search

Important - Before submitting the application, verify that all necessary data fields have been revised for this new application. If the application is filed incorrectly all fees may be lost, and you will be required to refile.

Date Created	Status/Permit No.	API No.	Operator	Lease	Well #	District	County	Filing Purpose	Wellbore Profile	Total Depth	
2005-04-30 19:58:56.705	600020	000001	RAILROAD COMMISSION DISTRICT 01	PK - PP TEST	22		BASTROP	New Drill	Vertical	5000	duplicate

- Click the **Duplicate** link. The system displays the *General Information* page of the permit.
- Enter or edit the data as described in the previous sections.

2.5 Reapply for Expired Permit

A drilling permit expires two years after the date it is approved and issued. You can reapply for an expired permit in the following scenarios:

- The purpose of filing is *New Drill*, and the well was not spudded.
- The purpose of filing is *Recompletion*.
- The purpose of filing is *Reenter*.

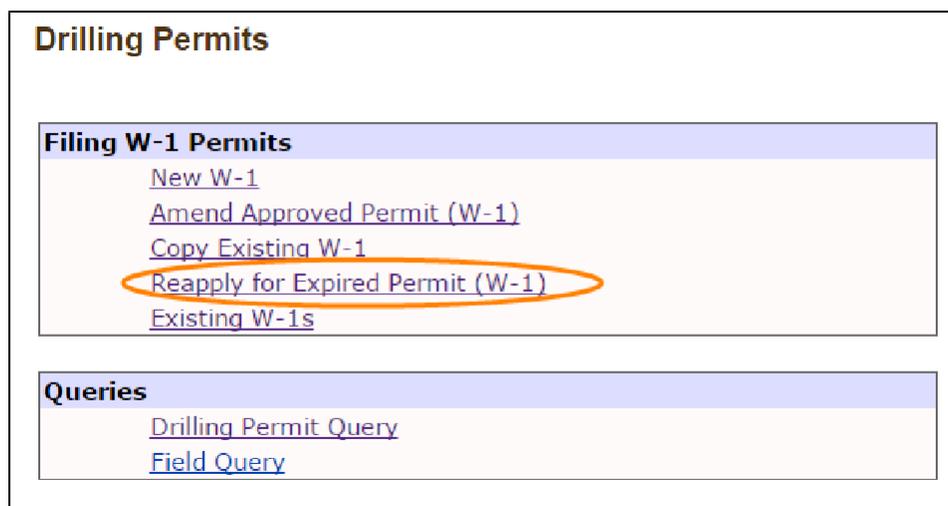

NOTE: If you spudded the well before the permit expired, report the date to your District Office. They will update the Commission's records to reflect an active permit that has not expired. Use the amendment process if the active permit needs any changes. See [Section 2.3](#) for more information about how to amend an approved permit.

For a permit where the purpose of filing is *New Drill*, you can keep the same API number when you reapply for the expired permit. This process is different from copying the permit, which would create a new API number for a *New Drill* application. See [Section 2.4](#) for more information about how to copy an existing W-1.

When reapplying for an expired permit, you cannot change the *Purpose of Filing*. You can choose to associate attachments from the most recent filing for the expired permit. A new *Status/Permit Number* is assigned when the application is submitted. New fees apply to the reapplication filing.

If you are not sure of the expired permit number, use the Drilling Permit Query to find it. See [Section 3.1](#) for more information about using this query. Be sure that reapplying for an expired permit is the correct action to take.

The following steps describe how to reapply for an expired permit.

1. Select the **Reapply for Expired Permit (W-1)** option from the Drilling Permits Main Menu. The system displays the *Reapply for Expired Permit (W-1)* page.

Reapply for Expired Permit (W-1)

Reapply for Expired Permit (W-1)

When to use the Reapply feature

- The original permit has expired because it was issued two years ago or more. This feature is only available for expired permits.
- The expired permit is for a New Drill, you have not spudded the well*, and you want to keep the same API number.
- Purpose of Filing for the expired permit must be New Drill, Recompletion or Reenter. Purpose of Filing cannot be modified when you reapply.
- You want the system to automatically associate the attachments from your original filing (you will still be able to delete any unneeded attachments, or upload additional attachments).

* If you spudded the well before the permit expired, report the date to your District Office. They will update the Commission's records to reflect an active permit that has not expired. Once the permit has been reactivated, if any changes need to be made, go back to the Drilling Permits Main menu and select the link named "Amend Approved Permit (W-1)."

How to use the Reapply feature

Indicate below whether the system should include attachments from the most recent filing for the expired permit. Attachments that will be automatically associated are the Plat, Log, P-12, P-16, and W-1A. Attachments such as a Service List or waivers that were required to resolve a SWR exception for the expired permit will not be included, since current resolution materials may be required.

Enter the Status/Permit Number of the expired permit and click Search. Summary information and a link to confirm that you want to reapply for this permit will display. After you click Reapply, information copied from the expired permit will display. You can modify any data except for API Number and Purpose of Filing.

When you save or submit the application, it will be validated using current statewide and special field rules. Current rules may require you to provide additional attachments or data such as GPS coordinates or off-lease indicators. If the original permit required a SWR exception(s), and if it is still applicable, you will have to reapply for it. You may also need to provide up-to-date materials to resolve the exception.

A new Status/Permit Number will be assigned when the application is submitted.

Include attachments from the original filing Yes No

Reapply for Expired Permit (W-1)

Status/Permit Number:

2. Enter the *Status/Permit Number* to reapply.
3. Click **Yes** or **No** to indicate whether the system will associate attachments for the original filing to the new permit. If you select **Yes**, attachments that are automatically associated are the *Plat, Log, Form P-12 Certificate of Pooling Authority, Form P-16 Acreage Designation, and Form W-1A Substandard Acreage Drilling Unit Certification*. Attachments such as a Service List or waivers that were required to resolve a SWR exception for the expired permit are not included, since current resolution materials may be required. You can delete any unneeded attachments or upload additional attachments.
4. Click the **Search** button. The system redisplay the page showing identifying information for the permit number that was entered.

Important - Before you start this process, verify that this is the correct Permit Number and API Number for the expired permit. Please note that the API Number and the Filing Purpose cannot be modified with this process. If the application is filed incorrectly all fees may be lost, and you will be required to refile.

Date Created	Status/Permit No.	API No.	Operator	Lease	Well #	District	County	Filing Purpose	Wellbore Profile	Total Depth	
2005-04-30 19:58:56:705	600020		000001 RAILROAD COMMISSION DIST 01	PK - PP TEST	22	01	BASTROP	New Drill	Vertical	5000	reapply

5. Click the **Reapply** link. The system displays the *General Information* page of the application.
6. Enter or edit the data as described in the previous section.

When you save or submit the application, it is validated using current statewide and special field rules. Current rules may require you to provide additional attachments or data such as GPS coordinates or off-lease indicators.

If the original permit required a SWR exception(s), and if it is still applicable, you must reapply for the exception. You may also need to upload up-to-date materials to resolve the exception. See [Section 2.1.4](#) for more information on resolving exceptions.

2.5.1 When You Cannot Reapply for a Drilling Permit

You cannot reapply for active or closed drilling permits.

2.5.1.1 Active Permits

You cannot reapply for a drilling permit that is active. If the well has been spudded, the drilling permit remains active until it is closed, even if it was issued more than two years ago.

2.5.1.2 Closed Permits

You cannot reapply for a drilling permit that is closed. For example, a drilling permit is closed after any of the following forms are filed with the Commission:

- *Form W-2 Oil Well Potential Test, Completion or Recompletion Report, and Log*
- *Form G-2 Gas Well Back Pressure Test, Completion or Recompletion Report, and Log*
- *Form W-3 Plugging Report*

To determine whether a permit is closed, use the Drilling Permit Query to view the *Form W-1* page. See [Section 3.1](#) for more information about using this query. As shown in the image below, at the top of the *Form W-1* page, a closed permit has a *Completion Information* section at the top of the screen, with a value in the *Well Status Code*.

Completion Information			
Well Status Code	Spud Date	Drilling Completed	Surface Casing Date
W - Final Completion	09/29/2014	10/14/2014	10/01/2014
Field Name	Completed Well Type	Completed Date	Validated Date
SUGARKANE (EAGLE FORD)	Gas	10/14/2014	06/29/2015

2.6 Existing W-1s

This option allows you to view lists of all pending, approved, or work in progress drilling permit applications.

1. Select the **Existing W-1** option from the Drilling Permits Main Menu. The system allows you to see lists of all of your existing permits that are approved, pending approval, or work in progress status.

Create Date	Lease Name	Well #	District	County	Purpose of Filing	Amended?	Problem
09/01/2011 09:08:17 AM	BROWN-1041	4137	8A	CROSBY	New Drill	N	
11/18/2011 08:06:35 AM	RANKIN, ETAL	142	8A	CROSBY	New Drill	N

2. When the page is displayed, it shows all of your W-1 applications that are in a *Work In Progress* status. To see *Approved* permit applications, select **Approved** from the *Current Queue* drop-down. Select **View All Pending** to see all permit applications that have been submitted but are not yet approved.

NOTE: *Work In Progress* applications are only viewable by the operator to which they belong.

If your application is in *Work In Progress* status, but you have attempted to make a payment, contact the [RRC Drilling Permits section](#) with the tracking number. The tracking number can be found in the application header.

Status # API # Tracking # 489770481	OP # [REDACTED] - [REDACTED] COMPANY II, LLC Work In Progress ,Created: 11/06/2015 ,Filed: Online	TEST LEASE - Well # 1 06 - TRAVIS County	New Drill Horizontal
---	--	---	-------------------------

3. You can sort the list by *Create Date*, *Lease Name*, *Well #*, *District*, *County*, *Purpose of Filing*, *Amended* (Yes or No), and *Problem* (Yes or No) by clicking on the column header name.
4. To view one of the W-1s, click on the *Lease Name* link. The system displays the *Review* page for that permit application. This page may contain links to an image of the current W-1 that is created by the system and to an image of the actual permit after the W-1 is approved.

2.7 RRC Approval Process

RRC staff review and process all submitted permit applications. If there are problems with your application, you will receive an email stating the issues. If there are no problems or when all problems are resolved, the RRC sends an email notifying you that your permit has been approved. The email contains a link to your drilling permit *Review* page. From this page, you can access links to a W-1 template containing the data you submitted on your application and to the approved drilling permit, both in PDF file format. These files can be viewed, downloaded, or printed for your records. A copy of the approved drilling permit is also mailed to the operator of record.

If you submit your W-1 via mail, all communications from the RRC regarding the application will be by mail.

3.0 QUERIES

3.1 Drilling Permit Query

You can search for W-1 applications that have been approved or those in the process of being approved. You can also search for permits that were withdrawn, dismissed, denied, as well as other status conditions. The search can be done by permit number, depth, date, county, district, filing purpose, and other permit attributes.

For any query, only one search criterion is required. However, entering more criteria narrows the search to fewer results. All criteria entered must be true for the W-1 to appear in the result list.

NOTE: *Work In Progress W-1s* do not appear in any query results except in the filing operator's *Existing W-1* search. See the *Existing W-1s* section ([Section 2.6](#)) and the *RRC Approval Process* section ([Section 2.7](#)) for more information.

For some of the criteria, you can expand your search results by using one of the options in the preceding drop-down lists:

- *contains* searches through the entire name record to find a match of the characters you enter.
- *begins with* searches the first few characters of the name records to find a match.

Drilling Permit Application Query

Select one or more search criteria below. If you select more than one search criterion, all of them have to be true for the W1 to appear in the results list.

Permit/Status No:
RRC District:
No Perf Zone:
***Off-lease Surface Location:** Horizontal or directional wellbore profile only.
***Off-lease Penetration Point:** Horizontal wellbore profile only.

*All returned records with an Approved Date before 2/28/2016 contain a value of 'No,' even when an off-lease condition is present. For records before this date, view the individual record.

Operator Name:
Lease Name:
Well No:

Lease Name search returns all records for that Lease Name. Lease Number search only returns records of wells on the Proration Schedule. For a broader results set, do not select a District.

Field Name:
Survey Name:
Total Depth: more than
SWR:

Field No:
Well Type:
Filing Purpose:
Amended:

Status:
Well Location:
Horizontal Wellbore Type: Horizontal wellbore profile only. Submitted Date must be after 4/8/2013.

Wellbore Profile:
Completion Status:

Approved Date: Begin: End:
Submitted Date: Begin: End:

Please Enter Dates In MM/DD/YYYY format

For alphabetic search criteria, such as operator name or lease name, enter at least three characters, the second or third of which can be a space. Entering more characters retrieves more specific search results.

For numerical search criteria, such as permit number or operator number, enter all the digits of the number.

Click **Submit** when you finish entering search criteria.

TIP: Click **Reset** if you need to erase all the entered search criteria and start over before submitting the query. Text boxes are cleared, and drop-down values return to their default values.

3.2 Field Query

This page allows you to search for fields and view the field rules associated with them. You can search by county, field number, or docket number, or search by field name.

The screenshot shows the 'Search Field Rules' form. It has a title bar 'Search Field Rules' and a section 'Enter Search Criteria'. Inside this section, there is a 'County:' dropdown menu set to '-All-', a 'Field Number:' text input field, a 'Search Field Name' button, and a 'Docket Number:' text input field with a note: '* Enter a number (99-9999999) to search for a field with current special horizontal field rules'. At the bottom of the form are 'Search' and 'Reset' buttons.

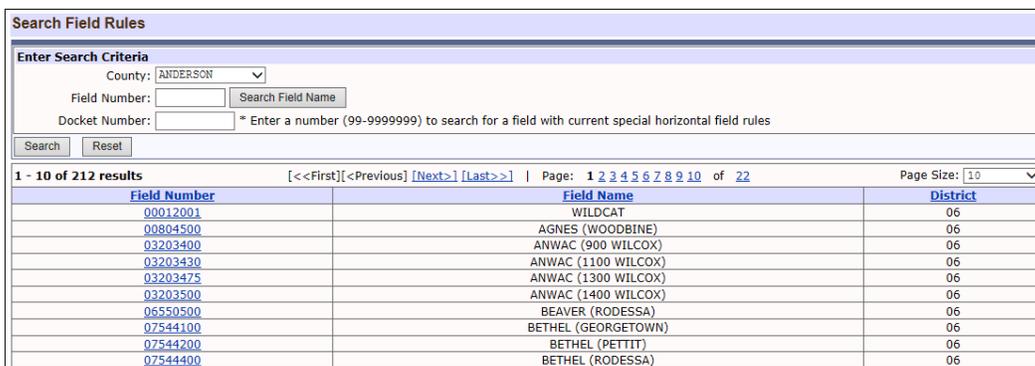

3.2.1 Search by County, Field Number, or Docket Number

You can search for fields by county, field number, or docket number.

1. Enter one or more of the following search criteria. Only one search criterion is required.
 - a. Use the *County* drop-down list to select the county that contains the field.
 - b. Enter the *Field Number*.

If you do not know the field number, you can find it by searching by the field name. Click the **Search Field Name** button. For more information about using the field name to find the field number, see [Section 3.2.2](#).

- c. Enter the *Document Number*.
2. Click the **Search** button. The system displays a list of all fields that match your search criteria.

The screenshot shows the 'Search Field Rules' form with search criteria: County: ANDERSON, Field Number: (empty), and Search Field Name: (empty). Below the form, it displays '1 - 10 of 212 results' and a table of search results. The table has columns for Field Number, Field Name, and District. The results are as follows:

Field Number	Field Name	District
00012001	WILDCAT	06
00804500	AGNES (WOODBINE)	06
03203400	ANWAC (900 WILCOX)	06
03203430	ANWAC (1100 WILCOX)	06
03203475	ANWAC (1300 WILCOX)	06
03203500	ANWAC (1400 WILCOX)	06
05550500	BEAVER (RODESSA)	06
07544100	BETHEL (GEORGETOWN)	06
07544200	BETHEL (PETTIT)	06
07544400	BETHEL (RODESSA)	06

3. Click a **Field Number** link to view its field rules. The system displays the field rules for that field.

NOTE: You can click the **New Search** tab to return to the initial search criteria screen or click the **Search Results** tab to return to the list of fields that match your search criteria.

The *Details* tab displays the field rules.

4. To view the *Final Order Document* for fields with special rules, click the link in the *History* area.

3.2.2 Search by Field Name

You can find the field number by searching by the field name. Then the system uses the field number to search for the field rules.

The screenshot shows the 'Search Field Rules' interface. It includes a 'County' dropdown menu set to '-All-', a 'Field Number' input field, and a 'Docket Number' input field. A button labeled 'Search Field Name' is highlighted with an orange circle. Below the input fields, there is a note: '* Enter a number (99-9999999) to search for a field with current special horizontal field rules'. At the bottom, there are 'Search' and 'Reset' buttons.

1. In the *Enter Search Criteria* screen, click the **Search Field Name** button. The *Select Field* screen displays.

TIP: You can also search by field number on this screen. In the *Search by Field Number* area, enter the *Field No.* and click the **Search** button.

The screenshot shows the 'Select Field' interface. It has three main sections: 'Search by Field Number' with a 'Field No.' input and a 'Search' button; 'Search by Field Name' with three radio button options: 'Beginning with these characters' (selected), 'Containing these characters', and 'Matching these characters exactly', followed by a 'Field Name' input and a 'Search' button; and 'Search Results' which is currently empty. At the bottom, there are 'Set Field Number' and 'Back' buttons.

2. In the *Search by Field Name* area, specify one of the following types of selection criteria to use:
 - **Beginning with these characters:** Searches the first few letters of the field name for the letters you specify. Enter a minimum of three characters. For example, to find the Carthage field, enter **CAR**.
 - **Containing these characters:** This is a wildcard search. Type in whatever letters you want to match in the query. For example, to find all fields with a reservoir of Austin chalk, enter **Aust i n**.
 - **Matching these characters exactly:** Enter the full field name.
3. Enter the partial or full *Field Name*.

- Click the **Search** button. The system displays a list of all fields that match your search criteria.

4.0 Getting Help

You can contact the RRC to request assistance with the Drilling Permits (W-1) system.

- For general assistance or questions about payments, contact the RRC Drilling Permits section at DrillingPermits-Info@rrc.texas.gov or 512-463-6751.
- For questions about required amendments, the correct purpose of filing (recompletion, reclassification, field transfer, or re-entry filings), or a specific field, contact the RRC Well Compliance section at prorationunit@rrc.texas.gov or 512-463-6975.
- For questions about P-5 filings, contact the RRC P-5 section at p5@rrc.texas.gov.
- If you successfully submit and pay for a drilling permit application but later need to pay additional fees, contact the RRC Public Sales department at 512-463-6882.

Appendix A: Form W-1 Instructions-Application for Permit to Drill, Recomplete or Re-Enter

REFERENCE: Statewide Rules 5, 36, 37, 38, 39, 40 and 86

09/2016

A. COMPLIANCE. In order to file a Form W-1 (APPLICATION FOR PERMIT TO DRILL, RECOMPLETE OR RE-ENTER) you must have a current Form P-5 (Organization Report) and financial assurance on file with the Railroad Commission of Texas (RRC) and be in compliance with all RRC rules and orders. DO NOT BEGIN DRILLING OPERATIONS UNTIL YOU HAVE RECEIVED AUTHORIZATION FROM THE RRC. Operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Groundwater Advisory Unit of the RRC, or its predecessor or successor agencies. If you wish to deviate from the recommendation given by the Groundwater Advisory Unit you must apply for a Statewide Rule (SWR) 3.13 surface casing exception from the RRC District Office that oversees your area.

B. WHERE AND WHAT TO FILE. File with the RRC in Austin the original Form W-1 application package, which consists of the completed Form W-1, fee payment, plat, completed Forms W-1D, Supplemental Directional Well Information or W-1H, Supplemental Horizontal Well Information as necessary, and other documents as required by Statewide or Field Rules. For fees, make check or money order payable to Railroad Commission of Texas. The SWR 37/38 exception fee covers one or more exceptions on the same application; if other than a “new drill,” provide the original exception case or docket number. Fees are non-refundable or transferrable. The RRC may waive fees if an amended application is filed at the request of RRC. Before you may file computer-generated paper Forms W-1, the RRC must approve the template. You may also electronically file drilling permit applications. For current fees and surcharges visit the RRC website at <https://www.rrc.texas.gov/oil-and-gas/applications-and-permits/oil-gas-fees-surcharges/>.

C. Filling out the Form W-1

In the box at the top left-hand corner of the Form W-1, enter, if assigned or as applicable, the API number, permit number (if purpose of filing is for an amendment to an already approved permit), If the API number is not known, in “Operator Remarks” area, provide the original operator, lease, and well identification and date of original completion or plugging.

Items 1-3 should be filled out exactly as it has been filed with the Form P-5.

The **LEASE NAME (Item 4.)** if it has already been established, should reflect exactly how it is carried on the proration schedule. If this is the first well on a lease the way the name is formatted will be how each subsequent well on the lease should be filed.

WELL NUMBER (Item 5.) must be formatted as follows: You are allowed six spaces, the first space can be either Alpha or Numeric, second, third and fourth spaces are Numeric only and the fifth and six spaces are Alpha only. If there is a dash anywhere in the numeric spaces, the well number will be changed to "0".

GENERAL INFORMATION

PURPOSE OF FILING (Item 6.):

New drill is for a brand new well location.

Recompletion is working over an existing wellbore to complete in a different field/reservoir. Provide the projected—not measured--true vertical depth. For a plug-back recompletion, give the depth of the plug setting.

Re-entry is going back into a wellbore that has been plugged to the surface.

Reclassification is changing an existing well originally permitted only as injection/disposal or other service well to an oil or gas producing well or changing an existing well in the Panhandle East or West fields from oil to gas or gas to oil production.

Field Transfer is required when you wish to move an already completed well from one regulatory field to another regulatory field when no work is being done to the existing well. Provide a copy of the Field Transfer approval letter with the application.

Amended should be chosen if you are attempting to change something on a previously approved permit that has not been closed out with a completion report or expired. Operator name, lease name, well number and acreage can be changed at the time of completion. Amended as-drilled should be chosen if the original permit was filed as a vertical well and due to drilling complications the wellbore was unintentionally deviated. You must also submit a Form W-1D to reflect the as-drilled bottom hole location (BHL).

An amended permit requires a new Form W-1 and applicable fees as well as all supporting documentation. Include the original drilling permit number when filing an application for an amended permit.

WELLBORE PROFILE (Item 7.) Choose all profiles that apply for your application. Remember if more than one profile is chosen then a plat must be supplied that supports each wellbore profile. Check “sidetrack” only for New Drills, Recompletions or Re-entries, if applicable. File **FORM W-1D**, if the proposed well configuration will be directional with one or more bottom hole locations. File **FORM W-1H**, if the proposed well configuration will be horizontal with one or more terminus locations.

REQUIRED ANSWERS IF DIRECTIONAL OR HORIZONTAL PROFILE IS CHOSEN (Item 8.)

8a. Check appropriate box that describes the location of your surface hole.

8b. If you have chosen a horizontal profile check the appropriate box that describes the location of your penetration point into the permitted formation.

8c. If your answer to 8b is yes choose all the appropriate boxes to describe how you are complying to the requirements concerning off-lease penetration points.

SPECIALIZED HORIZONTAL WELLBORE COMPLETION PERMITS (Item 9.) If you are attempting to apply for a PSA, Allocation or Stacked lateral check all boxes that apply. If the application you are filing is for a stacked lateral well please indicate the permit number of the “record” or “parent” well otherwise leave selections blank.

TRUE VERTICAL DEPTH (Item 10.) Provide the total vertical depth you wish to apply for not the proposed measured depth of the well. If for a recompletion, provide the projected—(not measured)--true vertical depth. If this is a plug-back recompletion, give the depth of the plug setting.

RIGHT TO DEVELOP (Item 11.) Indicate if you have the rights to develop under any right of way that may be located within your lease/unit boundary.

SURFACE LOCATION AND ACREAGE INFORMATION

RRC DISTRICT NO. (Item 12.) Provide the district number associated to the County the surface of the well is located in.

COUNTY (Item 13.) Provide the County Name for where the surface location of the well is being located.

SURFACE LOCATION (Item 14.) Check the appropriate box that best describes the location of the surface hole.

GEOGRAPHIC LOCATION OF YOUR WELL (Item 15.) Provide a distance and bearing from the nearest town in the county the well will be located. You must also provide geographic coordinates for the surface location of your well, no matter the purpose of filing. Choose the appropriate Datum and either provide X/Y(Northing/Easting) or Lat/Long coordinates.

LEGAL LOCATION INFORMATION (Items 16.-18. AND 22.) Provide all pertinent legal location information for the tract of land the surface hole will be located.

ABSTRACT NUMBER (Item 19.) If available, provide the abstract number associated to the survey the well is located.

NEAREST LEASE LINE (Item 20.) Provide the distance to the nearest lease line. For pooled units, if there is an unleased/non-pooled interest in a tract of the pooled unit that is nearer than the pooled unit line, give the distance to the nearest point on that unleased/non-pooled tract boundary.

Vertical wellbore profile that distance is from the surface location of the well.

Directional wellbore profile that distance is from the bottom hole location of the well.

Horizontal wellbore profile that distance is the nearest point to the lease line from the portion of the well between the first take point through to the last take point.

TOTAL NUMBER OF ACRES (Item 21.) Provide the total acreage in the lease, pooled unit or unitized tract you are filing on. Multiple tracts may be pooled together to meet minimum drilling unit acreage requirements. Complete and attach Form P-12, Certificate of Pooling Authority and ensure your plat supports the P-12 and the tract identifiers listed.

LEASE PERPENDICULAR CALLS (Item 23.) Provide 2 non-parallel lease line calls.

SURVEY PERPENDICULAR CALLS (Item 24.) Provide 2 non-parallel survey/section line calls. A county line should not be used to derive a call from unless that county line is actually a boundary to the survey/section.

POOLED UNIT (Item 25.) Is the acreage in Item 21 associated to a pooled unit? If yes you must submit a signed Form P-12.

UNITIZATION (Item 26.) Is the acreage in Item 21 formed by Unitization hearing? If so, provide the Docket number for that hearing.

SUBSTANDARD ACREAGE (Item 27.) If you are applying for a well on substandard acreage and are trying to get a permit approval without having to get a SWR 38 exception, attach a completed and signed Form W-1A, *Substandard Acreage Certification*.

FIELD INFORMATION

RRC DISTRICT NO. (Item 28.) Include the district number of the field you wish to complete in. This number may be different from the district number in Item 12.

FIELD NO. (Item 29.) Add the field number associated with the field you are applying for. Note that a field may be associated to different districts which will have a different field number. Ensure the correct field number is provided. If you need more room use the Form W-1 Field Information Addendum Page.

FIELD NAME (Item 30.) Provide the field name exactly as it is shown on the RRC proration schedule.

WELL TYPE (Item 31.) Use the following codes for Well Type: O = oil; G = gas; B = oil and gas; I = injection/disposal; R = storage; S = service; V = water supply; C = cathodic protection; T = exploratory test (core, stratigraphic, seismic, sulfur, uranium).

COMPLETION DEPTH (Item 32.) Enter the approximate completion depth at which you may complete in each field listed. This depth must be less than or equal to the Total Vertical Depth In Item 10.

DISTANCE TO NEAREST WELL IN RESERVOIR (Item 33.) Required only for wells identified as oil or gas in Item 31 and includes distance to any applied for, permitted location or completed well in the regulatory field being applied for.

NUMBER OF WELLS ON LEASE IN THIS RESERVOIR (Item 34.) Provide the total combined number of oil and gas wells only (include all applied for, permitted locations and completed wells). Do NOT include injection, disposal or other types of service wells.

REQUESTS FOR EXCEPTIONS AND REQUIREMENTS OPERATOR MUST COMPLY WITH

REQUIREMENTS THAT OPERATOR MUST COMPLY WITH IF APPLICABLE TO THE INTENDED OPERATION BEING APPLIED FOR.

REQUESTS FOR SWR EXCEPTIONS (Item 35.) The proposed location must be “regular” in terms of the RRC’s spacing (Rule 37 or field rules) and density (Rule 38 or field rules) requirements for each listed field; otherwise, an exception to those requirements must be sought. Answer all questions that apply to this application. With your application remember to include waivers, a service list or supporting information for a request of unaffected status. See below for explanation of regular location and location requiring an exception. Any request for Publication must be accompanied by a Due Diligence letter explaining why you need to publish the notice instead of relying on direct notification. The Service List is still required.

REGULAR locations are in accordance with either (1) statewide spacing minimums – 467’ from the nearest lease line and 1,200’ from the nearest well (applied for, permitted or completed) on the same lease in the same reservoir and statewide density minimums – 40 acres; (2) spacing and density minimums, (which may vary according to depth) for County Regular Fields (Districts 7B, 9, and McCulloch County), where there are no field rules and the proposed depth is 5,000’ or shallower; or (3) spacing and density standards set out in special rules for the field. Field and County Regular rules are available on the Internet at www.rrc.texas.gov.

EXCEPTIONS to minimum standard spacing and density requirements may be requested. The application requires a certified plat with the names of the affected offsets clearly labeled and a list of the names and addresses of the affected parties. a certified plat with the names of the affected offsets clearly labeled and a list of the names and addresses of the affected parties. To view SWR 37 and 38, visit the Texas Secretary of State website at Detailed instructions for SWR 37 and 38 exceptions can be found at <https://www.rrc.texas.gov/media/f4kbgn4s/drilling-permits-statewide-rule-37-38-exceptions.pdf>.

NOTE: If you penetrate a SWR Rule 37 or SWR38 field/reservoir not listed on the application, you will not necessarily be allowed to use the existence of this wellbore as justification for an exception to complete this wellbore in such field/reservoir in the future.

ACREAGE – OTHER

If pooled or unitized through a hearing and the Docket number is noted in Item 24 of Form W-1, no Form P-12 is needed.

Substandard Acreage: Complete and submit a Form W-1A, Substandard Acreage Drilling Unit Certification, with the first and only well on a substandard tract or lease, and when using surplus acreage as a substandard pooled unit.

Contiguous Acres: SWR 39 requires that all acres being assigned to the well from the lease or pooled unit be contiguous. If a SWR 39 exception has already been granted for the subject lease or unit, provide the docket number and issuance date in the box in the upper left-hand corner of the Form W-1.

PLAT. All drilling permit applications must be accompanied by a legible, accurate plat, at a scale of 1" = 1,000' or 1"=2000' and showing at least the lease or pooled unit line nearest the proposed location outlined on the plat using either a heavy line or crosshatching AND the nearest section/survey lines. The plat for the initial well on a lease or pooled unit must be of the entire lease or unit (including all tracts being pooled). The plat for subsequent wells on the pooled unit for which a Form P-12 is required must show the entire pooled unit. If necessary, submit the large area plat at a scale of 1" = 2,000' showing the entire lease.

For **all plats** the following must be included: the geographic location information, including the Latitude/Longitude or X/Y coordinates in the NAD 27, NAD 83, or WGS 84 coordinate system of the surface location, a labeled scale bar and northerly direction arrow.

For vertical wells, the plat shall include the following:

- (A) the surface location of the proposed drilling site;
- (B) perpendicular lines providing the distance in feet from the two nearest non-parallel survey/section lines to the surface location;
- (C) perpendicular lines providing the distance in feet from the two nearest non-parallel lease lines to the surface location;
- (D) a line providing the distance in feet from the surface location to the nearest point on the lease line, pooled unit line, or unitized tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, the nearest point on that unleased tract boundary shall be used. If well is directional the distance is taken from the bottomhole;
- (E) a line providing the distance in feet from the surface location to the nearest oil, gas, or oil and gas well identified by number either applied for, permitted, or completed in the same lease, pooled unit, or unitized tract and in the same field and reservoir. If well is directional the distance is taken from the bottomhole.

For horizontal wells, the plat shall include the following:

- (A) the surface location of the proposed drilling site, penetration point, first take point, last take point, and terminus location;
- (B) perpendicular lines providing the distance in feet from the two nearest non-parallel survey/section lines to the surface location;

(C) perpendicular lines providing the distance in feet from the two nearest non-parallel lease lines to the surface location; if location is off-lease, then provide the distance in feet from the two nearest non-parallel survey/section lines to the surface location;

(D) a line providing the distance in feet from the horizontal wellbore between and including the penetration point and the terminus location to the nearest point on the lease line, pooled unit line, or unitized tract line. If there is an unleased interest in a tract of the pooled unit that is nearer than the pooled unit line, the nearest point on that unleased tract boundary shall be indicated. A line providing the distance in feet from the horizontal wellbore between and including the first take point and the last take point to the nearest point on the lease line shall be indicated. If there are multiple leases, pooled units and/or unitized tracts closer to the horizontal course(s) of the drainhole(s) than allowed by the applicable spacing rule, then the operator shall provide the distance in feet from the closest take point to each such tract;

(E) a line providing the distance in feet from the wellbore from the penetration point through the terminus location to the nearest oil, gas, or oil and gas well identified by number either applied for, permitted, or completed in the same lease, pooled unit, or unitized tract and in the same field and reservoir. A line providing the distance in feet from the wellbore between and including the first take point and the last take point to the nearest oil, gas, or oil and gas well identified by number either applied for, permitted, or completed in the same lease, pooled unit, or unitized tract and in the same field and reservoir;

Plats filed for Pooled Units, SWR 37 and/or SWR38 exceptions must also be certified by the surveyor or someone with the company who has knowledge of information being presented. If plat is filed in support of an exception you must clearly have offsets keyed to the offset listing.

Appendix B: Frequently Asked Questions

1. [How do I file drilling permit applications online through the RRC Online System?](#)
2. [What is needed to file drilling permit applications electronically?](#)
3. [How will I file my plat and other forms that need to accompany my application?](#)

42. [My system timed out while I was in the middle of making a payment. What do I do?](#)
43. [Under what conditions can I receive a refund or credit from the RRC?](#)
44. [Why do some wells remain in my Work In Progress queue indefinitely after I attempt payment?](#)

How do I file drilling permit applications online through the RRC Online System?

Before you can file online, you need a User ID and password assigned to you by your company's designated Security Administrator. Below are the steps that need to be followed.

- Designate a Security Administrator(s) by filing of a Security Administrator Designation ([SAD\) Form](#) with the Railroad Commission if one has not already been designated. The Commission assigns a User ID to the Security Administrator.
- The Security Administrator must assign User IDs and filing rights for any person filing electronically. **DO NOT FILE A SAD FORM FOR EACH PERSON FILING ELECTRONICALLY.**
- Log into the RRC Online System by entering the User ID and password assigned to you by your Security Administrator. (You can change your password once you have logged in.)
- Select the Drilling Permit Applications System, and file your application online using the pages that are provided.
- **If you are set up to file your PR reports online only, you still must be set up to file Drilling Permits online.**

What is needed to file drilling permit applications electronically?

To submit filings through the RRC Online System, the following is required:

- Personal Computer
- Internet connection
- Standard web browser, such as Microsoft Internet Explorer (version 5.5/SP2 or higher)
- Image scanner for capturing attachments electronically
- A scanning resolution with a minimum of 200 dots per inch is required for recording documents that contain no type font smaller than six points. For documents with a type font smaller than 6 points, scanning resolution must be adequate to ensure that no information is lost.

For plats, Operators are required to enter pre-scanned plat paper size and to show a scale bar on the plat. When the scanned plat is printed out from the electronic record on the same size paper as the original, the scale is the same. The bar ensures that the scale is identical.

- Visa, Master Card, American Express, Discover, or e-check for payment of permit fees. Payment of fees may only be made through the State of Texas payment portal by credit card or e-check. Access to the payment portal is provided with the application. A processing fee is added to each charge. **ALL FEES ARE NON-REFUNDABLE.**

How will I file my plat and other forms that need to accompany my application?

Scan and save your plat and any forms that need to accompany your application. The online application pages provide the ability to search for, attach and identify the scanned files as part of the application. ALL ATTACHMENTS MUST BE IN EITHER .TIF OR .PDF FILE FORMAT. If your application requires an exception and you must attach a service list, that file can be saved and attached in any of the following formats: .CSV, .TIF, .PDF, .DOC, or .DOCX.

Can I still submit drilling permit applications on paper forms?

Yes, Drilling Permit Application Forms are available for downloading on the [RRC Forms Library](#) website. However, electronic filing is encouraged.

Is the Drilling Permit Application available through the [RRC Online System](#) different from the one previously available through the ECAP System?

The new application is similar to the one previously available through ECAP but has been enhanced with some additional features including:

- Ability to expedite processing of electronically filed permits by paying an expedite fee.
- Option to select multiple fields instead of entering one field at a time.
- Ability to copy location information from a primary field to other fields to eliminate duplicative key-entry.
- Expanded query capability that includes a broader range of drilling permit information including historical permits.
- New online help pages to assist filers.

How will I be informed about problems with my drilling permit application if I file online?

The online pages have built-in checks and edits that prevent certain types of format errors. Other types of errors may be detected when Railroad Commission staff reviews your application. Staff will contact you through the problem email system if filed online, or a problem letter if you filed by paper, or a phone call if absolutely necessary to resolve problems that are detected in the application review process. If no response is received within 90 days of notification of the problem(s), the permit will be dismissed. **FEES WILL NOT BE REFUNDED.**

How will I be informed when my permit is approved if I file my drilling permit online?

An email is sent notifying you that your permit has been approved. The email contains a link to your drilling permit review page. From this page you can access links to a W-1 template containing the data you submitted on your application, and to the approved drilling permit, both in PDF file format. These files can be viewed, downloaded or printed for your records or to be posted on the drill site. A copy of the approved drilling permit is mailed to the Operator of record if filed on paper. All permits can be downloaded through the Permit Query online.

My plat is too large to fit on scanner. What should I do?

First, verify that the plat you are trying to scan does not include a larger area than required. Refer to Statewide Rule 5(h) for plat requirements. If the plat is oversized and does not fit on your scanner, you can either have it scanned and saved as file by the Railroad Commission's Central Records Section in Austin (\$0.25/sq.ft.) or by a commercial company. Oversized plats must be scanned in their entirety and cannot be scanned in sections. If need be, you can also file your permit application and plat in hard copy, but you are encouraged to file electronically.

What setting should I scan with?

The scanner should be set to 200 x 200 dpi and saved as black and white. This results in most files being less than 100 KB.

The online system is saying that my filing will expire in 30 days, I have not spud my well yet. Why is the system telling me that?

You are allowed two years from the date of approval of first filing to spud the well. If you have not spud the well and are amending the filing with 30 days or less before the permit expires, the system will inform you that you only have 30 days to spud your well or it will expire, and any amendments will not matter. **ANY AMENDMENTS THAT ARE MADE TO FILING AFTER THE INITIAL APPROVAL DATE DO NOT PROLONG THE LIFE OF THE PERMIT.**

The online system will not let me make changes on my filing. Why?

If you are trying to amend the filing, please check to see if the filing has had a completion filed on it. **THE SYSTEM WILL NOT ALLOW YOU TO MAKE ANY ADDITIONS OR CORRECTIONS TO FILINGS ONCE THAT FILING HAS HAD A COMPLETION FILED ON IT. MAKE SURE ALL INFORMATION IS CORRECT BEFORE YOU SUBMIT THE W-1.** Please call the Drilling Permit Section for further instruction. Also, once you have submitted your filing to the RRC, you cannot make any changes because it has been submitted to the RRC for the approval processing. Depending on what type of change you are asking will determine if it can be made through RRC Management.

I noticed information is different on my filing than what I submitted. Why?

If there are any changes made after the filing has been submitted to the RRC, it is approved through the Operator for the RRC staff to change. If working with double browsers opened, your information can be corrupted. If that is the case and your filing is already approved, you will have to amend your filing to correct information that was corrupted. **NEVER WORK WITH TWO BROWSERS OPEN AT THE SAME TIME!**

FAQS – General Information Page

How many characters are allowed in the Lease name box?

You are allowed 32 characters. If the name is longer than that, you can abbreviate if needed, but are encouraged to adhere to the allotted characters set up by the RRC.

Is there a certain way the system accepts well numbers?

Yes. The system allows the well number to be formatted a certain way. You are allowed six spaces, the first space can be either Alpha or Numeric, second, third and fourth spaces are Numeric only and the fifth & six spaces are Alpha only. If there is a dash anywhere in the numeric spaces, the well number will be changed to “0”.

Can I change my location after the filing has been submitted to the RRC?

No. Once the filing has been submitted, no location change can be requested by the Operator/Consultant. **IF YOU ARE NOT SURE OF THE LOCATION, DO NOT FILE.** If the Operator requests a change, you will be advised to withdraw your filing and restart the filing over.

Can I change information on the General Information page after adding fields to the permit?

You cannot change the lease name. If you change the profile after adding fields, the existing field wellbore profiles remain. Return to the Field Details page and remove the profiles that do not apply and create new ones.

Do I have to complete every field on the General Information page before saving?

You can save at any point after you enter the purpose of filing, indicate the wellbore profile, enter the lease name, enter the well number, and county. Data fields missing are flagged as errors. You cannot submit the application with errors. Your application with a status of work in progress can contain invalid data and empty fields; you do not have to complete it in one sitting. If you start an application and save it, you can locate it from the main Drilling Permits page by clicking the Existing W-1s link.

FAQS – Field List Page

Where do I enter the field details?

All fields added to the permit application are displayed in the table on the Field List page. The last column of the table has an Edit link and a Delete link. Click the Edit link to open the Field Details page, where you enter field specifics. The system does show you the Field Details tab until you add at least one field to the permit.

Where do I enter the field name?

Fields are added to a permit by using a field search query. On the Field List page, click the **Add Field** button and enter the search criteria. When the search results are returned, select a field from the list.

Why can't I delete a field?

There are two possible reasons. If you only have one field in the table on the Field List page, it is considered the primary field and you cannot delete a primary field. To remove

this field, add another field and make it the primary field. Then the system allows you to delete the original field. Also, if a plat is associated with a field on the Attachments page, you cannot delete the field. Go to the Attachments page and delete the association and, if it is the only field associated with the plat, delete the plat.

FAQS – Field Details Page

The field I selected will not allow me to select Oil or Gas, why?

Check to see if the well has been consolidated into another field. You can check the proration schedule or you can check the Field Query page to see if it says in the remarks section what field it has been consolidated into. Another way to check in the field rules section if the well has been consolidated is to look where it says “DON’T PERMIT”. If it has a “Y” under it that means that the well has been consolidated into another field.

Can I change the reference name of a profile?

You cannot. The application supplies the names based on the wellbore profile you selected on the General Information page. If you chose Horizontal, the first profile is automatically named TH1, the second TH2, and so on. When you add a profile, it becomes the next sequential number.

I do not see a Field Details tab; how do I enter details for a field?

The Field Details tab until you have added at least one field to the permit. Select the Field List tab. You add a field to the permit by submitting a query for the field name or number. When you select a field name from the search results, it displays in the Field List table. Click the Edit link in the Field List table to open the Field Details page for that field. It is recommended that you add one field, which automatically becomes the primary field, then enter all the details about that field before adding additional fields to the permit.

When I add a second field, why is the surface location and wellbore profile data already filled in?

When you enter the surface location information for the first field, the subsequent fields you add contain the same section, block, and survey information. You can change any of the information necessary.

FAQS – Exceptions Page

The total acreage in my lease is less than required by field or statewide rules; can I still apply for a permit?

Along with the application (Form W-1), certified plat, and additional filing fee, a Form W-1A must be submitted before a determination can be made.

What is required if I apply for an exception to SWR 37 and/or 38 and I cannot determine who is the immediate offset Operator or mineral interest owner?

If the immediate offset Operator and/or mineral interest owner cannot be located or determined, notice by publication is required. The official notice of application or notice of hearing issued by the Railroad Commission must be published. It is the applicant's responsibility. The Commission notice must be published in a newspaper that serves the county in which the proposed well is located. The publication is required once a week for four consecutive weeks. The publisher's affidavit must be presented to the Railroad Commission before the application is considered for approval.

Who is required to receive notice for a SWR 37 between well exception?

Anyone that touches the tract that is listed as total acreage on the application must be notified, including offset Operators and/or unleased mineral interest owners.

Who is required to receive notice for a SWR 37 lease line exception?

Anyone that is a direct offset and anyone that is within one-half of the between well spacing distance to the subject well must be notified, including offset Operators and/or unleased mineral interest owners. In the case of a horizontal filing, the entire wellbore from penetration point to TL must be tested by SWR 37.

Who is required to receive notice for a SWR 38 exception?

Anyone that touches the tract that is listed as total acreage on the application must be notified, including offset Operators and/or unleased mineral interest owners.

FAQS – Attachments Page

I only have a partial plat. Is that ok to file?

A plat of the entire lease must be filed when it is the first well on the lease by current Operator. Subsequent partial plats are okay to file thereafter.

Why is the system showing my attachment is too large to upload?

If there is any color in your attachment it makes your dpi (dots per inch) larger, which makes the file size appear bigger than what it really is. Attachments should be filed in black & white and no gray scale (gray scale has a tendency to not show up once scanned in). The size of the file must be less than 4 Megs or it will not upload.

Why is the system kicking me out when I am uploading my attachment(s)?

Please check to see if you have any special characters (i.e....&, *, #, etc.) in your file name. The system does not recognize those as part of a file name and will reject your attachment. The filename must be no more than 80 characters or it will generate an error also.***The plat is not a computer file; can I still attach it to the online form?***

Scan the plat it to make it a computer file. Once it is a computer file, you can open it in most paint programs and save it as a TIF or a PDF file.

What is a "certified" plat?

For the plat to be recognized by the RRC as "certified," it must meet one of the following conditions:

1. A certified surveyor prepared the Plat and the surveyor's seal is on the plat.
2. Anyone in the company with knowledge of the facts can certify with the statement, "All information on this plat is true to the best of my belief and knowledge."

FAQS – Comments Page

Can I enter a comment from any screen in the application?

No. You enter comments on the Comments page. You can have only one comment. You may change it several times as you work on the application. However, when the application is submitted, the last comment entered is accompanied by the application.

Can I change an existing comment?

If you have an existing comment and choose to add a comment, the comment that exists is overlaid with the new text you enter. You can have only one comment.

FAQS – Review Page

Has my permit been submitted once it has no errors and I've clicked Submit?

No. You must complete the payment process before it can be accepted by RRC.

Can I check to see my filing before it has been submitted to the RRC?

Yes. At the bottom of the review page (next to the **Submit** button) there is a "Review W-1" link that displays your "As Submitted W-1" as it will be submitted to the RRC. You must make changes, corrections & additions to your filing before you submit the filing to the RRC. **IF THERE ARE ERRORS, YOU MUST WITHDRAW THE W-1 AND REFILE. FEES WILL NOT BE REFUNDED.**

FAQS – Payment Page

Can I file online and pay for several W-1's at once?

No. The Texas Online Payment Portal processes charges for each application at the time it is submitted. Applications without sufficient payment cannot be submitted.

Can I submit the application without a payment?

No. You cannot submit the online application without going through the Texas Online Payment Portal. If you cancel the payment process, the application status remains a work in progress. Applications without sufficient payment cannot be submitted.

If I pay too much, will I receive a refund?

No. The Texas Online Payment Portal processes only the total of the charges noted on the payments page. All fees are non-refundable.

My system timed out while I was in the middle of making a payment. What do I do?

Be sure to process your payment within an hour or you'll get a Session Timeout on the Payment Portal page.

If you have not put in the credit card payment, please check your "work in progress" queue to see if the filing is still in there, if it is still there, you most likely did not get charged and continue the payment process.

If you did put the credit card number in the system, **DO NOT ADD CREDIT CARD NUMBER AGAIN.** First, check to see if the filing is in your work in progress queue, if it is, then call the RRC at 512-463-6751 and explain your situation. The system may have accepted the credit card payment but failed to move your filing into the RRC Online System. If you file a payment twice on the filing, the fees will be non-refundable and credits will not be given for future filings.

Will I get confirmation once I have submitted my filing to the RRC Online System?

Yes. Once you have successfully paid through the Payment Portal, the system will send you an email informing you that the system was successfully submitted. It will also inform you of the status number of the filing, your trace number, authorization number and payment amount. Please keep this information for your records; the RRC does not keep up with this information.

Under what conditions can I receive a refund or credit from the RRC?

None. RRC policy states that no fees are ever refunded or credited.

Why do some wells remain in my Work In Progress queue indefinitely after I attempt payment?

An application in your Work In Progress queue will be automatically deleted by the system after 30 days of inactivity unless there was a payment attempt made for that application. If there was a payment attempt made for an application, it will remain in the queue indefinitely. We are aware of this issue and regret any inconvenience it may cause. This system limitation will be addressed when the Drilling Permits online system undergoes a major upgrade or is rewritten.

Is it possible to reuse documents already submitted to the RRC in a new permit application filing?

If you are using the [Reapplication for an Expired Drilling Permit](#) process, you will have the ability to choose to use the original documents filed with the expired permit as long as what was originally filed is still valid. Attachments that will be automatically associated are the Plat, Log, P-12, P-16, and W-1A. If the expired permit required an exception to SWR 37 or SWR 38, any attachments filed in support of that exception like the Service List or Waivers will not be able to be reused. Current resolution materials will be required to be attached and certified by the applicant.

Appendix C: Requirements for Participation

Authorization Procedures

Required Authorization Procedure for Operators

Before filing electronically, an Operator must be authorized by completing a hard copy Security Administrator Designation (SAD) form. Both Commission and Operator representatives must sign the agreement. The Operator's representative may be an officer or director of the corporation or an employee of the corporation authorized to approve and sign Commission Organization Reports (Form P-5s) on behalf of the corporation (if it does business in the corporate form), a partner (if it does business as a partnership), or the Operator individually (if it is a sole proprietorship). The signature of the Operator's authorized representative on the agreement shall be deemed to appear on all electronically filed forms as if it actually appeared. The SAD establishes terms of agreement for electronic filing for up to ten years but can be canceled upon notice by either the Operator or the Commission.

Security Administrator Designation

A Security Administrator Designation form must be on file as a condition of participation in online Drilling Permits. The form can list at least one or up to nine security administrators for the company. The security administrator(s) will have complete control over who within the company receives authorization to file electronically. SAD form, the security administrator will be notified of his or her assigned UserID. The security administrator can then further distribute security by assigning additional user IDs to employees within the company and designating which forms they are authorized to file electronically through online filing.

Required Authorization Procedure for Non-Operators

By completing the Security Administrator Designation form, non-Operators declare that all electronic transmissions of forms through online filing shall be in a manner prescribed by the Railroad Commission of Texas that is compatible with its software, equipment, and facilities and shall comply with all provisions of the Required Procedures for Participation in Interactive Online filing.

Where to Send the Security Administrator Designation

The Security Administrator Designation is to be sent to:

Permitting/Production Services

1701 North Congress

PO Box 12967

Austin, Texas 78711-2967

Fax 512-463-7324

Receipt of the Security Administrator Designation will be acknowledged with a letter.

Appendix D: General Procedures for Electronic Filing

General Requirements

To submit filings online through Drilling Permits, the following equipment is required:

- Personal computer.
- Internet connection.
- Standard web browser, such as Microsoft Explorer or Netscape Navigator.
- Image scanner for capturing attachments electronically.

Each of the Oil and Gas Division district offices and the Austin office will have the required equipment available for use by Operators and consultants during business hours.

Scanning

A scanning resolution with a minimum of 200 dots per inch is required for recording documents that contain no type font smaller than six point. For documents with a type font smaller than 6 point, scanning resolution must be adequate to ensure that no information is lost.

For plats, Operators will be required to enter pre-scanned plat paper size and to show a scale bar on the plat. When the scanned plat is printed out from the electronic record on the same size paper as the original, the scale is the same. The bar will ensure that the scale is identical.

Payment Methods

A Visa or MasterCard is required for payment of permit fees. The credit card information can be submitted as part of the application and processed once the Commission has reviewed the application, or you can pay directly through the State of Texas payment portal.

Public Information (Open Records) Act

All Drilling Permit information maintained at the Commission is subject to the Public Information (Open Records) Act, Chapter 552 of the Texas Government Code.

Appendix E: Geological and Engineering Data Required for SWR 38 Administrative Exceptions

Applicants for exceptions to Statewide Rule 38 density provisions are required to submit the following engineering and geological information for each applied-for field in support of the request when seeking administrative approval.

For All Applications

1. Area map showing mineral ownership of offsetting wells, offsetting leases, and unleased tracts.
2. Cross section(s) indicating continuity or discontinuity of reservoir.
3. Structure map and/or isopach map indicating limits of reservoir (if relevant).
4. Recoverable reserve calculations for subject lease, pooled unit, or unitized tract, with supporting data.
5. Cumulative production from wells on subject lease, pooled unit, or unitized tract that ever produced from each applied-for field.
6. Estimated of remaining recoverable reserves from existing wells on subject lease, pooled unit, or unitized tract, with supporting data.

When the Requested Exception Is to Prevent Waste

7. Items 1-6, above.
8. Estimate of remaining recoverable reserves from offset wells affective subject lease, pooled unit, or unitized tract, with supporting data.
9. Cumulative production from offset wells affecting subject lease, pooled unit, or unitized tract.
10. Amount of recoverable reserves which will not be recovered by wells on or affecting the subject lease, pooled unit, or unitized tract.

Other relevant information may be required to evaluate the request. If any of the above required data cannot be submitted, the applicant must include a written explanation.
