Comments concerning proposed rulemakings

As a 77 year old Texas landowner, I'm deeply concerned about changes to State wide rule 8 proposed on August 15, 2024. The new rules don't do enough to protect our land and ground water.especially after removing important safeguards like groundwater monitoring and construction standards for pits. I'm asking the Railroad commission to reconsider and strengthen two key areas:: 1 Set clear standards for building, operating, and closing these pits. Without them, our groundwater and land are at serious risk. 2. Require landowner consent before waste is permanently buried on our property. The substances in these pits are harmful, and we deserve the rights to decide what happens on our land. Our state's energy industry can still thrive while protecting Texas land and water. Please strengthen these rules.
